Wireless Conference to be Available via Web

A live audio link to the North Dakota Statewide Wireless Telecommunications Conference will be available on Tuesday, September 20th for those who are unable to attend the conference in-person. The link will be found on the homepage of the North Dakota Public Service Commission (www.psc.state.nd.us).

“I’m pleased that this webcast will be available for those individuals who have an interest in wireless telecommunications in North Dakota, but who cannot join us in Bismarck on that day,” said Commissioner Tony Clark. “It’s the kind of opportunity that technology makes possible, and something that until recent years, would not have been an option.”

The one-day conference will be held at Bismarck’s Radisson Hotel and will focus on the importance of wireless telecommunications in economic development, public safety and quality of life. Some of the leading representatives of the wireless industry will be present, including keynote speaker Steve Largent, who is President and CEO of CTIA – The Wireless Association. Largent is a former U.S. Congressman from Oklahoma, a record-setting NFL wide receiver, and a member of the professional football Hall of Fame.

For more information on the wireless conference, please visit www.ndwirelessconference.com, or call 701-328-2400.
