AT&T UNIPLAN SERVICE

20.1 DESCRIPTION (Cont'd)

20.1.6 AT&T Uniplan Service OneRate Pricing Option IV-R (ORPO IV-R)

(N)

Uniplan Service OneRate Pricing Option IV-R (ORPO IV-R) permits customers to select the usage rate schedules specified below in lieu of the rates specified for standard ORPO. The Uniplan ORPO IV-R intrastate rate schedules provide postalized rates for Inbound calling, Outbound calling and Calling Card calls. The Uniplan ORPO IV-R customer must subscribe to the interstate Uniplan Service ORPO IV and to a new Uniplan Service 12- 24- or 36-month Term Plan as described AT&T's tariff F.C.C. No. 1.

(N)

Refer to PRICE SCHEDULE

20.2 ACCESS

An access line connects a customer's premises or a customer's private network to AT&T Uniplan Service. There are two types of access lines: Special Access and Local Exchange Service Switched Access. Special Access and Local Exchange Service Switched Access may be furnished at the same location or different locations.

20.3 RATES AND CHARGES

Refer to the PRICE SCHEDULE

20.3.1 Application of Charges

Rates include monthly charges, usage charges and nonrecurring charges that apply per Main Billed Account. The monthly charge per switched access location, special access location and Main Billed Account are billed in arrears and apply whether or not the customer uses the service. Waiver of monthly charges is subject to a monthly usage requirement. Usage and nonrecurring charges are billed in arrears. Usage charges apply to all completed calls on AT&T Uniplan Service. Nonrecurring charges apply when the customer orders service to be installed, moved or changed.

20.3.2 Mileage Measurements

The mileage for AT&T Uniplan Service calls is the distance in airline miles measured between (for Special and Switched Access) the V&H coordinates for the rate centers associated with the originating and terminating stations.

An Action Point Number (APN) is a non-geographic number that routes calls to a specific AT&T switch and trunk group. For APN numbers, mileage will be calculated from the AT&T Central Office. Originating APN calls are measured from the V&H coordinates of the originating AT&T Central Office and terminating APN's are measured from the V&H coordinates of the terminating AT&T Central Office.
