What's The Catch?

There is no catch.

*** Long Distance is a general term used to describe an information service offered by CallSmart. This service is an alternative to traditional long distance using voice over internet technology.**

Frequently Asked Questions

1. How does this work?

With your home phone or office phone, you dial a local number to get to the CallSmart network. Once you are connected, a message will prompt you to dial the number you wish to reach. You then dial the number your calling, 1+Area Code+number.

2. Where can I call?

Anywhere in the USA and Canada (excluding Alaska & Hawaii).

3. How about calls in North Dakota?

Yes, anywhere in North Dakota.

4. How can CallSmart offer unlimited residential long distance* for only \$39.99/month?

CallSmart is using a new technology, Voice over IP (VoIP). When you place a long distance call with CallSmart, we change your voice to data and send your call over the Internet. VoIP is a much more efficient way to send your call across the state or across the country and we pass those savings on to you.*

5. Will I notice a difference in voice quality when I use VoIP?

No. CallSmart takes great pride in providing the best quality possible.

6. Do I need any additional equipment to use CallSmart?

No. All you need is local phone service and a phone. CallSmart also works with cellular phones.

7. Do I need to change my long distance* carrier?

No. Since you are dialing a local access number to use CallSmart, you do not have to change anything.

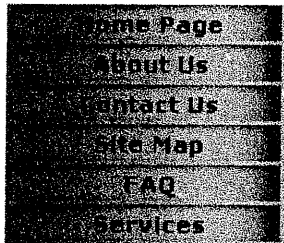

8. Can I send faxes using CallSmart?

Absolutely

*** Long Distance is a general term used to describe an information service offered by CallSmart. This service is an alternative to traditional long distance using voice over internet technology.**

How to use CallSmart

Two Easy Steps!

(You must be registered before you
can access CallSmart)

1. Dial (local
access number)* to
access the
CallSmart network.
2. Dial the area

code and number
you wish to call.

***Local Access
Numbers:**

Bismarck 355-2255

Fargo 356-2255

Dickinson 456-3711

TIPS:

1) You may start entering the number you are calling while the greeting is playing.

2) Make your local access number a speed dial preset on your phone.

3) Make sure your caller ID is unblocked. We use your caller ID to authenticate your account when you call. If you do not hear our greeting, call again after you unblock your caller ID. Here's how: (*82) 355-2255

4) Make sure your phone is set to tone not pulse.

Caution

CallSmart is not responsible for any 1+ calls made with other long distance* carriers. The CallSmart network is accessed by dialing a local access number.
