Jerry,
We are trying to create a bit more separation from the access road (I mistakenly called it a prairie trail) depicted in the black lines and the foundation for J-1. There will be a spur from the black-lined road to J-1 that is not depicted on the map. The landowner will still have continued use of the faint prairie trail you can see on the map although it looks like the trail is being blocked there will be a gravel pad around the turbine to allow continued use of the trail. In addition, he will have use of our access road per our agreement with the landowner. Tim

Tim – looking at the map the new location appears to still be on the trail???

Subject: PU-05-305-Proposed Relocation of Turbine J-1

Rugby Wind LLC proposes relocating turbine J-1 44 feet to the SSE of the originally proposed turbine location. The rationale for the move is to provide additional spacing to an unimproved prairie trail that runs diagonally to the north of the proposed turbine location. Please feel free to contact me if you have any questions.

Sincerely,
