RE: Case No. PU-05-47 –Rugby Wind LLC ADLS Implementation Complete

Dear Sir or Madam:

Rugby Wind LLC (“Rugby”) respectfully submits this update of implementation of Aircraft Detection Lighting System (ADLS) light mitigation required by N.D.C.C. Chapter 69-06-01 at its Rugby Wind Farm, located in Pierce County, North Dakota.

Rugby’s ADLS system became operational on March 18, 2022. We were able to expedite the commissioning process by hiring an aircraft to fly over the project instead of waiting for aircraft to randomly fly over the system.

Please let us know if you have any questions or would like additional information.

Sincerely,

 /s/ Peter Landoni
