Sandy,

[Here you go.](#)

I faxed them to my computer so I could send them to you. I cut the 11 x 17 pages in half to fax them to my computer.

Thanks,

Daniel Holli

Pat,

Here are the tree mitigation reports per your request. A copy has been sent to you by mail. If you have any questions, please call me at 701-575-4254 x 34.

The electronic files contain information for both projects and need to be split out. The mail copy is separated into individual reports.

Thanks,

Daniel Holli

Thanks Dan,

In approximately two weeks, when the plantings are complete, please file tree mitigation reports that include Plains' log of numbers and types of trees and shrubs affected by the construction projects, the numbers and types of replacement trees and shrubs planted, and the specific planting area(s) and the date of the plantings. A separate report should be filed for the Trenton Expansion Project and for the Buford Expansion Project.

Patrick,

Thank you for the e-mail.

It was my impression that a record of the number of trees and shrubs quantified and logged prior to construction was to be included as a part of the tree planting and monitoring report due in September.

I have been retaining the quantity logs of trees and shrubs affected by the construction projects as logged prior to construction for inclusion in that report.

If you would like to receive this information prior to the September report, please let me know.

Note:

The trees and shrubs became available from the Williams County Soil Conservation District office on May 30th. Planting will be taking place this week and next week.

Thanks,

Daniel Holli

Subject: Trenton and Buford Expansion projects

Good morning,

Just a reminder concerning the Trenton Expansion (Case No PU-05-184) and Buford Expansion (Case No PU-05-185) projects. The Commission's orders in those cases require that:

"trees or other woody vegetation must be replaced with saplings that are two or more years old at a rate of two for every one removed. Landowners shall be given the option of having replacement trees/shrubs planted off the right-of-way on the landowner's property or waiving that requirement in writing and allowing Plains to plant the replacement trees/shrubs elsewhere. All effected trees and shrubs will be quantified before construction activity. Plains will record, and file with the Commission, the numbers and types of replacement trees and shrubs planted, the specific planting area(s) and the date of the plantings. Plains shall inspect tree replacements once a year for three years, on the anniversary of the plantings, and send a report on or shortly before October 1 of 2006, 2007, and 2008 to the Commission documenting work completion and condition of woodlands planting. The Commission may order additional plantings if survival rates are less than 75% of the required ration of two for one."

To date, the Commission has not received a report quantifying, before construction activity, the trees/shrubs affected by the construction activity. Also, Plains has not filed a plan for tree mitigation or the numbers and types of replacement trees and shrubs planted, the specific planting area(s) and the date of the plantings.

Please let me know when Plains Pipeline will be filing this information.
