

PLAINS
PIPELINE, L.P.

September 18, 2007

Mr. Patrick Fahn
North Dakota Public Service Commission
600 East Boulevard, Dept. 408
Bismarck, ND 58505-0408

Dear Mr. Fahn:

Enclosed is the second annual report to present woody vegetation survival for trees and shrubs replanted under Public Service Commission order No. PU-05-185 for pipeline construction in Williams County, ND.

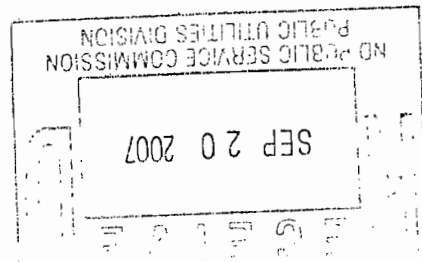

Replacement trees and shrubs were inspected on September 17, 2007. The woody vegetation was found just under 70% growing in the areas inspected. Replanting of woody vegetation will be done in the spring of 2008 with a subsequent report in the fall.

Please call me at 701-575-4254 ext. 34 if you have any questions.

Respectfully,

Daniel Holli

Tree Damage and Replacement Report for order No. PU-05-185

Paul Eldridge: (Total 150 initially planted)

97 plantings of woody vegetation were found to survive at this time.

This corresponds to a survival rate of 64.6%.

~~Replanting of woody vegetation that did not survive will be done in the spring of 2008.~~
The subsequent woody vegetation survival report will be submitted in the fall of 2008.

Tim Langwald (450 initially planted)

307 plantings of woody vegetation were found to survive at this time.

This corresponds to a survival rate of 68.2%.

Replanting of woody vegetation that did not survive will be done in the spring of 2008.
The subsequent woody vegetation survival report will be submitted in the fall of 2008.
