Subject Fw: Enbridge Energy Project Update as of 5-6-06

Hi Laura,

Can you help me pull together an information package for Mr. Fahn? I have promised it within two weeks. We will need to provide the following:

1. A PDF Copy of the Construction Specification. It is in Jenessia old cubicle in the ND file # 04.01.01
2. I will place material specifications into a folder on the V drive so that you can copy them on to the same CD.
3. Place the above onto a CD and make one copy for us.
4. We would need an transmittal letter for the above and for the CD(s) Paul will provide.

Paul,

I need you to provide a CD of the ND PDF drawings and one 11X17 printed set.

Please call me on my cell phone if you have any questions.

Thank you both very much.

John

Mr. Pechin,

I just thought of sending an informal reminder that the Commission's order states: "Enbridge shall provide the Commission with a copy of the design specifications for the construction of the East Fork Station, the Alexander Station, and the Trenton Station showing the location of the project facilities as built.

Patrick J. Fahn

Subject: Enbridge Energy Project Update as of 5-6-06

Dear Mr. Fahn,

We our contractor started on May 1 to finish off the project punchlist.
The
work completed to date is shown in the attached punchlist. Except for
Painting we are complete at the Alexander station.

The contractor is currently working at Trenton and once complete will be
moving to East fork later in the week.

We expect the mechanical and electrical work to be completed this week
or
next depending on the weather.

The painting work will not start until June 1 at the earliest. This is
because we want to wait until night time temps are expected to stay
above
50 Deg F and to combine this painting with some of the painting that
Operations needs completed.

If you have any questions please call me at the numbers below. Please
note
the new contact information.

Best Regards,

John
