To the Public Service Commissioner

I was Glad to see that the P.S.C. has taken a stand against MDU on the North Bismack Project.

My understanding is that the Power Co. supplies Power to the meter when you have a new building, and from there it is the owners responsibility.

In my case MDU wanted to charge me \$360. to trench from there Pole to my building. I didn't accept that so the representative from this area told me to go over head at no cost. So I said go overhead, that's when I talked to the head representative from Mobridge S.D. office and he told me I would have to buy a Pole all the wire pay \$28.00 an hour to do the work. this reps name was Mr Haas.

I finally went to Bismarck, Rented a trencher and put in my own trench for a total cost of \$89.00

Now MDU charges me \$20.00 a month for the rest of my life for the big expenses they had for wire and labor which amounted to approximately \$300.00

Please I would like a response.

Sandi,

I'm forwarding this to you in case we have to set up a Public Input file in this case. If you see Bill before I do you can ask him. Or we may have to ask Illona.

Boulder Ridge development issue...Has experience with Capital Electric...Would recommend that MDU take over the Boulder Ridge project because Capital Electric doesn't have to come before the PSC...As a customer, he has to go to the Board of Directors for any issues he has.
