RE: Request For Proposal Numbers: PU-08-115 and PU-06-421  
Consulting Services for Siting  
ProSource Technologies, Inc.

Dear Ms. Geiger:

We are submitting this letter of recommendation for Curt Proud of ProSource Technologies, Inc. in connection with the proposed work for the North Dakota Public Service Commission. We understand the project involves inspection services on a pipeline construction project and other work analyzing energy conversion and transportation facility siting applications. We believe that Curt is technically and ethically well qualified for this work.

For several years, we had dealings with Curt, initially as an adversary regarding land use issues between his employer Williams Pipe Line Company and our aggregate mining company and later as a consultant to audit and evaluate work and claims made by a pipeline company. We are also aware of his dealings with the attorneys and survey and engineering firms we use and the City of Apple Valley, Minnesota.

Based upon our observations and dealings with Curt on various matters, we believe he is well suited to represent the North Dakota Public Service Commission to provide inspection services and develop Permit specifications on behalf to the State.

Sincerely,

Name

Title VP Operations
