**RE: ND PSC Route Permit (PU-06-443) Modification Request
Transmission Line for Tatanka Wind Farm**
File: 20062569.00

Dear Ms. Jeffcoat-Sacco:

On behalf of Tatanka Wind Power, LLC, with this filing we are requesting the amendment of Public Service Commission (PSC) route permit PU-06-443 for the Tatanka Wind Farm transmission line in Dickey and McIntosh County, North Dakota. As previously discussed with PSC staff, a number of field modifications were made to structure locations on the Tatanka transmission line to further reduce environmental impacts or to address landowner requests. Unfortunately, these changes were not adequately communicated to the Public Service Commission (PSC) staff or described in detail in the weekly construction update reports that were submitted by the contractor. For those omissions, we sincerely apologize to the PSC and Commission staff.

Exhibits 1, 2 and 3 show the route that was proposed in the original route permit application as compared to the as-built route. **Table 1** lists the changes on a structure-by-structure basis and the specific reasons the changes were made. We have included the changes in the area of structures 39-45 to avoid trees that the Commission approved on March 21, 2007. Also enclosed are the as-built plan and profile drawings (**Appendix A**). None of the modifications result in increased environmental impacts and all revised locations are consistent with the factors considered and evaluation criteria analyzed in the original PSC route permit application. We are transmitting by messenger an original and ten copies of these materials. If there are any questions regarding this request or the enclosed materials, please feel free to contact me at 952-697-5706 or by email at ron.peterson@westwoodps.com.

Sincerely,

WESTWOOD PROFESSIONAL SERVICES
