Subject: RE: Tongue River Installation Method Change Request

This morning I visited individually with each of the Commissioners concerning Enbridge's request to change the installation method at the Tongue River crossing from an open cut, as described in ordering clause #12 of the Commission's December 31, 2007 Findings of Fact, Conclusions of Law and Order in Case No. PU-07-75, to a horizontal direction drill. The Commissioners each indicated that staff could respond to Enbridge's request. Please consider this to be Commission staff approval of Enbridge's request.

Subject: Tongue River Installation Method Change Request
Importance: High

Patrick:

Per our discussion this afternoon, attached is the letter, which I will send out in the morning, which is Enbridge's request to change the installation method at the Tongue River from an open cut to a horizontal directional drill. As discussed, we are planning on performing this installation in a day or so, so I would appreciate it if you could get back to me in the very near future. Please accept my apologies for this request being 'last minute' if you will, but the internal change was brought on just recently, and I appreciate your partnership in getting this request approved.

Also, the archeological information that you have requested was sent to you a while back from either Tim Drake, or Dan Flo, but I will look into obtaining that info, myself, and forwarding it on to you.

If you have any questions, please give me a call on my mobile.

Thank you.
