PUBLIC SERVICE COMMISSION

August 26, 2008

Ms. Susan Wefald
Commissioner
North Dakota Public Service Commission
600 E. Boulevard Ave., Dept. 408
Bismarck, ND 58505

Dear Ms. Wefald:

Enbridge is completing the construction of the LSr Pipeline in Pembina County. We are notifying affected landowners that our contractor, Precision Pipeline LLC, is planning to pressure test the pipeline near the pipeline right-of-way with water between Tuesday, September 2 and Friday, September 5, 2008. This test is being conducted to verify the integrity and safety of the newly constructed pipeline before beginning operations.

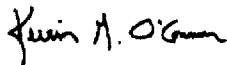

We are advising landowners that before, during and after this testing, people involved in conducting and monitoring this test may be on and near the pipeline right-of-way. These individuals will be wearing hard hats and other safety gear. They may need to be on the right-of-way after dark to monitor the test.

This test involves using water at high pressure to verify that the pipe will maintain its integrity when it is in normal operation. If there is a leak during this planned pressure test, water may be released on the pipeline right-of-way. It is possible that the ejection of water under pressure could throw vegetation, mud and rocks. While the probability of a pipe failure in any one location is low, we are asking our neighbors to avoid the pipeline right-of-way and areas immediately adjacent to the right-of-way during this testing period.

We are aware that harvesting is occurring at this time. Landowners are asked to contact Rick Djernes at 701-238-0475 or John Finstad at 701-680-0975 if they or their tenants plan to be in the fields near our pipeline right-of-way during the planned hydrotest. We are also asking landowners to notify us of any cattle in the vicinity of the pipeline right-of-way.

If you have any questions regarding this planned pressure test, please contact me at 612-347-7879.

Sincerely,

Kevin O'Connor
