**Enbridge Energy, Limited Partnership
36-inch LP Pipeline/Pembina County
Siting Application**

Case No. PU-07-108

NOTICE OF FILING AND NOTICE OF HEARING

August 22, 2007

On April 16, 2007 Enbridge Pipelines (Southern Lights) L.L.C. (Enbridge SL) filed an application for waiver of procedures and time schedules, and consolidated applications for a certificate of corridor compatibility and a route permit authorizing construction of approximately 28 miles of 20-inch liquid petroleum pipeline and associated facilities in Pembina County of North Dakota (LSr Project).

On July 16, 2007 Enbridge Energy, Limited Partnership (Enbridge LP) filed an application for waiver of procedures and time schedules, and consolidated applications for a certificate of corridor compatibility and a route permit authorizing construction of approximately 28 miles of 36-inch liquid petroleum pipeline and associated facilities in Pembina County of North Dakota (Alberta Clipper Project).

The proposed route for the pipelines is shown on the attached map.

Enbridge SL and Enbridge LP request the Commission waive the procedures set forth in North Dakota Century Code Sections 49-22-08 and 49-22-08.1 to allow for single consolidated applications for Corridor Certificate and Route Permit for their projects. Enbridge SL and Enbridge LP further request that the Commission reduce the minimum width of the corridor for their projects, from 2.8 miles, required under North Dakota Administrative Code Section 69-06-04-02, to 1 mile.

The Commission finds the application of Enbridge SL is complete. The Commission finds the application of Enbridge LP is complete.

A public hearing on these applications is scheduled to begin **Tuesday, October 2, 2007 at 1:30 p.m. at the Cavalier Law Enforcement Center, Lower Level Meeting Room, Courthouse Drive, Cavalier, North Dakota.**

The issues to be considered in each proceeding are:

1. Will the location, construction, and operation of the proposed pipeline produce minimal adverse effects on the environment, natural resources, and upon the welfare of the citizens of North Dakota?
2. Is the proposed pipeline compatible with the environmental preservation and the efficient use of resources?
3. Will the proposed pipeline corridor and route minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?
4. Is it appropriate for the Commission to waive the procedures as requested in the application including the request for a single consolidated application for Corridor Certificate and Route Permit?
