Re: Preconstruction Conference Minutes
Alberta Clipper Project – Case No. PU-07-108

Attached are the preconstruction conference minutes from our meeting beginning at 12:05 pm on Thursday August 6, 2009. Attendees at the meeting from Enbridge and its contractor are shown in Attachment 1.

The meeting began with review of the State of North Dakota Public Service Commission (ND PSC) Order regarding Enbridge Energy's 36 inch Alberta Clipper pipeline (Project) Case No. PU-07-108. Minutes regarding review of the Order are as follows:

1. Noted with no discussion.
2. The route will follow the Order.
3. Changes or deviations from the pipeline route will be submitted for approval by the ND PSC. Requests for ND PSC approval for any such deviation will be sent via email to Patrick Fahn.
4. Noted with no discussion.
5. A list of all permits received to date was filed with the ND PSC on July 31, 2009. Any additional permits received (e.g., Presidential Border Crossing Permit) will be sent to Patrick Fahn at the ND PSC by email and then followed up with a hard copy.
6. Enbridge ROW will verify that we have all required landowner written waivers when the pipeline is within 500 feet of a residence, school or place of business. [Note: ROW followed up on this item following our meeting and all required waivers have been obtained].
7. Completed.
8. Enbridge will notify ND PSC of the intended construction start date and will follow-up with notification of the actual date construction is started. Enbridge will also provide weekly reports to the ND PSC. The reports will contain the Case No. PU-07-108 to identify the reports. The first report will be submitted on week after the actual start date and be subsequent to Enbridge's weekly meetings held on Wednesdays.
9. Agreed with no discussion.
10. Agreed with no discussion.
11. Agreed with no discussion.
12. The archeological survey was completed. This crossing stays to the south and utilizes a HDD. Trees will be avoided at the Tongue River crossing to the extent practicable.

13. The width of clear cuts through wooded areas and shelterbelts have been kept at a maximum of 50 feet and, where possible, have been necked down further to avoid trees.
14. Enbridge will comply with this provision.
15. Agreed with no discussion.
16. Cultural resource mitigation plans have been submitted to the ND SHPO and approved.
17. The plan follows the requirements of the Order regarding topsoil.
18. Reclamation will be in accordance with Order. It is the intent that reclamation work in North Dakota be completed in 2009.
19. Agreed. Roads will be restored to original or better condition.
20. Enbridge has complied with provision.
21. Enbridge will verify that our plans are in compliance with NRCS. Any deviations from the plan will be submitted to the ND PSC for approval. [Note: After the meeting, Enbridge ROW reviewed landowner requests for restoration in the line list. The only special requests for seeding were on CRP lands. The seed used on CRP lands is specified by the NRCS.]
22. A tree and woody vegetation count is currently being performed. This information along with the replacement plan will be submitted to the ND PSC when completed.
23. Agreed with no discussion.
24. Enbridge will comply with this provision. If it is not possible to provide this information within the 3 month period, Enbridge will request a variance. Patrick asked if we could provide "as built" with all existing Enbridge pipelines represented in the information. Enbridge will provide this information if it is available.
25. Agreed with no discussion.

The second part of the meeting included a review of the Energy Conversion and Transmission Facility Siting Act and penalties that could be levied for non-compliance with the ND PSC Order. Patrick Fahn discussed each of the following actions that could be taken:

1. Suspension or revocation of permit
2. Seeking injunctive relief; and,
3. Penalties including the possibility of a Class A Misdemeanor and/or fine not to exceed \$200,000.

The meeting concluded with discussing the Enbridge contact person(s) that the ND PSC could contact in the event there were landowner calls/emails. Contacts include:

Primary Contact – Marc DeVarenes (see Attachment 1 for contact information)

Secondary Contact – Tom Hodge (see Attachment 1 for contact information)

Other contacts, in the event that either Marc or Tom is not immediately available, include Tony Madden (Construction Manager) and Paul Turner (Environmental Manager). Please see Attachment 1 for contact information.

Respectfully submitted,

Jeff Wiklund
