Kevin –

Please consider this e-mail as staff approval of Basin Electric's requested structure #106 movement.

Thank you.

Subject: Belfield to Rhame structure move

Jerry,

Basin Electric is requesting PSC concurrence to move structure #106 on the Belfield to Rhame Transmission line. As depicted on the attached map, the structure would be moved approximately 35' to the NE and would stay on the permitted route centerline. The purpose of the move is to put more distance between the structure and a wet area (which is unusually large this year). The landowner (Dorothy Eldringhoff) has been contacted regarding the structure #106 move and concurs with the proposed relocation.

Please copy Duey M. on your response, as I will be out of the office most of next week.

Please let me know if you have any questions, comments or concerns.

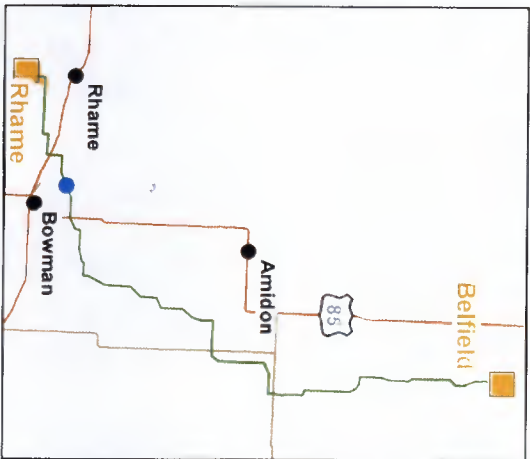

Thanks,

Kevin L. Solie
