Renewable Electricity and Recycled Energy Tracking
Miscellaneous Case**

Case No. PU-07-318

NOTICE OF OPPORTUNITY FOR HEARING

February 27, 2008

The North Dakota Public Service Commission is considering designating Midwest Renewable Energy Tracking System (M-RETS) as program administrator to carry out the administrative responsibilities related to the renewable energy certificates tracking program as set forth in Chapter 69-09-08 of the North Dakota Administrative Code.

Chapter 69-09-08 establishes a program to include tracking, recording, and verifying the transactions associated with certificates and credits for electricity generated from renewable electricity sources as defined in North Dakota Century Code Section 49-02-25 among electric generators, utilities, and other interested entities within this state and similar entities in other states. The statute and the rule apply to all public utilities, electric cooperatives, and municipal electric utilities.

M-RETS was launched in July 2007 and has begun registering participants and generating facilities, with the cost funded by a participant-based fee structure. Generating units, load serving entities, and marketers may participate in M-RETS. Fees will be charged according to a schedule set by M-RETS. Although participation is voluntary, electricity generation applied to North Dakota's renewable energy and recycled energy objective must be independently verified through a third party credit tracking system selected by the Public Service Commission.

The issue to be considered is should the Commission designate M-RETS as program administrator?

Those interested are invited to comment on the application in writing. Persons desiring a hearing must file a written request identifying their interest in the proceeding and the reasons for requesting a hearing. Comments and requests for hearings must be received by **April 1, 2008**. If deemed appropriate, the commission can determine these matters without a hearing.
