

TAB 6 – Mitigation Plan Exhibits

- Figure 6.1.1 Typical Construction Layout
- Figure 6.1.2 Typical Topsoil Segregation – Ditch Plus Spoil Side
- Figure 6.1.3 Typical Topsoil Segregation – Full Right-of-Way
- Figure 6.1.4 Typical Topsoil Segregation – Trench Line Only
- Figure 6.1.5 Typical Temporary or Permanent Berms – Perspective View
- Figure 6.1.6 Typical Temporary or Permanent Berms – Elevation View
- Figure 6.1.7 Typical Silt Fence Installation
- Figure 6.1.8 Typical Straw Bale installation
- Figure 6.1.9 Typical Trench Breakers – Perspective View
- Figure 6.1.10 Typical Trench Breakers – Plan and Profile Views
- Figure 6.2.1 Typical Waterbody Crossing – Wet Trench Method
- Figure 6.2.2 Typical Waterbody Crossing – Dam and Pump Method
- Figure 6.2.3 Typical Waterbody Crossing – Flume Method
- Figure 6.2.4 Typical Waterbody Crossing – Directional Drill Method
- Figure 6.2.5 Typical Timber Mat Bridge
- Figure 6.2.6 Typical Rock and Flume Bridge
- Figure 6.2.7 Typical Dewatering Measures
- Figure 6.2.8 Typical Straw Bale Dewatering Structure
- Figure 6.3.1 Typical Wetland Crossing
- Figure 6.4.1 Typical Paved Road Crossing – Sediment Control
- Figure 6.7.1 Permanent Slope Breakers – Perspective View
- Figure 6.7.2 Erosion Control Blanket - Steep Slopes ($\geq 30\%$)
- Figure 6.7.3 Typical Final Stream Bank Stabilization – Rip Rap & Erosion Control
