Re: 2-13-08 Agenda Item SW-2 Briefing Memo – Langdon Wind Expansion
Case No. PU-07-722

My review of Langdon Wind's application for an expansion amendment to its certificate of site compatibility indicates that all of the requirements in the Commission's application guidelines have been addressed. Therefore, I recommend the application be deemed complete. However, there are some activities still underway:

1. Micro-siting: The company has provided preliminary turbine locations in its application and is further evaluating and refining those locations in order to provide final proposed sites prior to the hearing.
2. Wetlands Inventory: Langdon Wind reports that wetlands field work was completed last fall and it plans to file a written study report by February 14th.
