PUBLIC HEARING DIVISION

Jerry,

I am sending this in for Al, bear with me while I wing it.

Pillsbury Sub - Industrial Builders installed 24 auger foundations to bring the total to 51, excavated 2 breaker pads, and completed spreading the topsoil along with the bale checks. The weather is hindering progress as it seems about the time things are drying out the rain returns.

Outlet Line - This week Irby spotted 50 complete structures (284 to date), framed 56 (270 to date), set 44 (234 to date), installed 50 ground rods. We continue to grade and clear township along with other access roads as required. No foundations were installed this week due to the inclement weather and the unstable soil conditions. Irby has found a home for all the excavated material, they have alot more takers than material. Jacobsen Tree Service is worked on the right-of-way Steffis property as they progress East.

Let me know if I need to address anything else.

Thanks,

Todd
