Re: Records Request for South Heart Coal, LLC  
PSC Case No. RC-08-828  
PSC Case No. PU-08-052

Dear Michelle:

Thank you for your 20 February 2009 letter requesting records regarding South Heart Coal, LLC.

Enclosed is a copy of the Letter of Intent in PSC Case No. PU-08-052 which you requested. Documents in the mining permit case, RC-08-828, will be forwarded separately in the near future.

If I can be of further assistance please do not hesitate to contact me.

Best regards,

Illona A. Jeffcoat-Sacco  
General Counsel

**Re: Letter of Intent – South Heart Project**

Dear Ms. Jeffcoat-Sacco:

On behalf of South Heart Coal LLC (SHC), Great Northern Power Development LP (GNPD) is pleased to notify the North Dakota Public Service Commission (PSC) of its intent to construct and operate a coal-to-synthetic natural gas production facility (facility) in southwest North Dakota near the community of South Heart in Stark County. That planned facility is a component of the South Heart Project (SHP), which would also include an adjacent surface lignite mine that would provide raw material to the planned facility.

SHC is a wholly owned subsidiary of GNPD, a privately held natural resource development company affiliated with Great Northern Properties – the nation's largest private coal reserve holder. GNPD, headquartered in Houston, TX, maintains offices in Bismarck, ND and in Townsend and Miles City, MT.

In a previous letter to you dated August 18, 2005, GNPD notified the PSC that it intended to construct and operate a 500 MW lignite-fired steam-electric generating station on the same site. This letter updates and revises that August 18, 2005 notification to reflect changes to the facility design. GNPD no longer plans a lignite-fired steam-electric generating station as a component of the SHP.

This letter and its attachments are intended to fulfill SHC's obligations under Chapter 69-06-03 of Title 69 of the North Dakota Administrative Code to file a Letter of Intent at least one year prior to filing an application for a certificate of site compatibility.

**Size and Type of Facility**

The planned facility would be a nominal 100 million standard cubic feet per day (MMSCFD) synthetic natural gas (SNG) production facility. The final design production capacity has not yet been determined as process design refinements are ongoing at this writing. However, as currently configured, it would use seven British Gas Lurgi gasifiers and associated downstream process units to convert lignite from the adjacent mine into pipeline quality natural gas.

The facility is intended to serve the natural gas needs of North Dakota, North Dakota industries, and the people and industries of the Upper Midwest.

### **Map of Study Area**

Figure 1 attached to this letter is a map of the study area showing the planned SHP location in North Dakota (inset), the planned site for the SHP production facility and the location of the planned lignite mine.

### **Anticipated Construction and Operation Schedule**

SHC currently plans to begin construction of the facility in December 2009 and commence commercial operation in December 2012.

### **Estimated Cost of Construction**

The estimated cost for the construction of the facility is \$1.4 billion.

GNPD looks forward to working with the PSC and its staff to obtain all required approvals for the SHP production facility and those for the associated lignite mine. Please do not hesitate to contact Rich Voss, V.P. Power Development at 701-223-8783 ([rvoss@gnplp.com](mailto:rvoss@gnplp.com)) or me at 406-266-4360 ([rsouthwick@gnplp.com](mailto:rsouthwick@gnplp.com)) with any questions pertaining to SHC, GNPD, or the SHP.

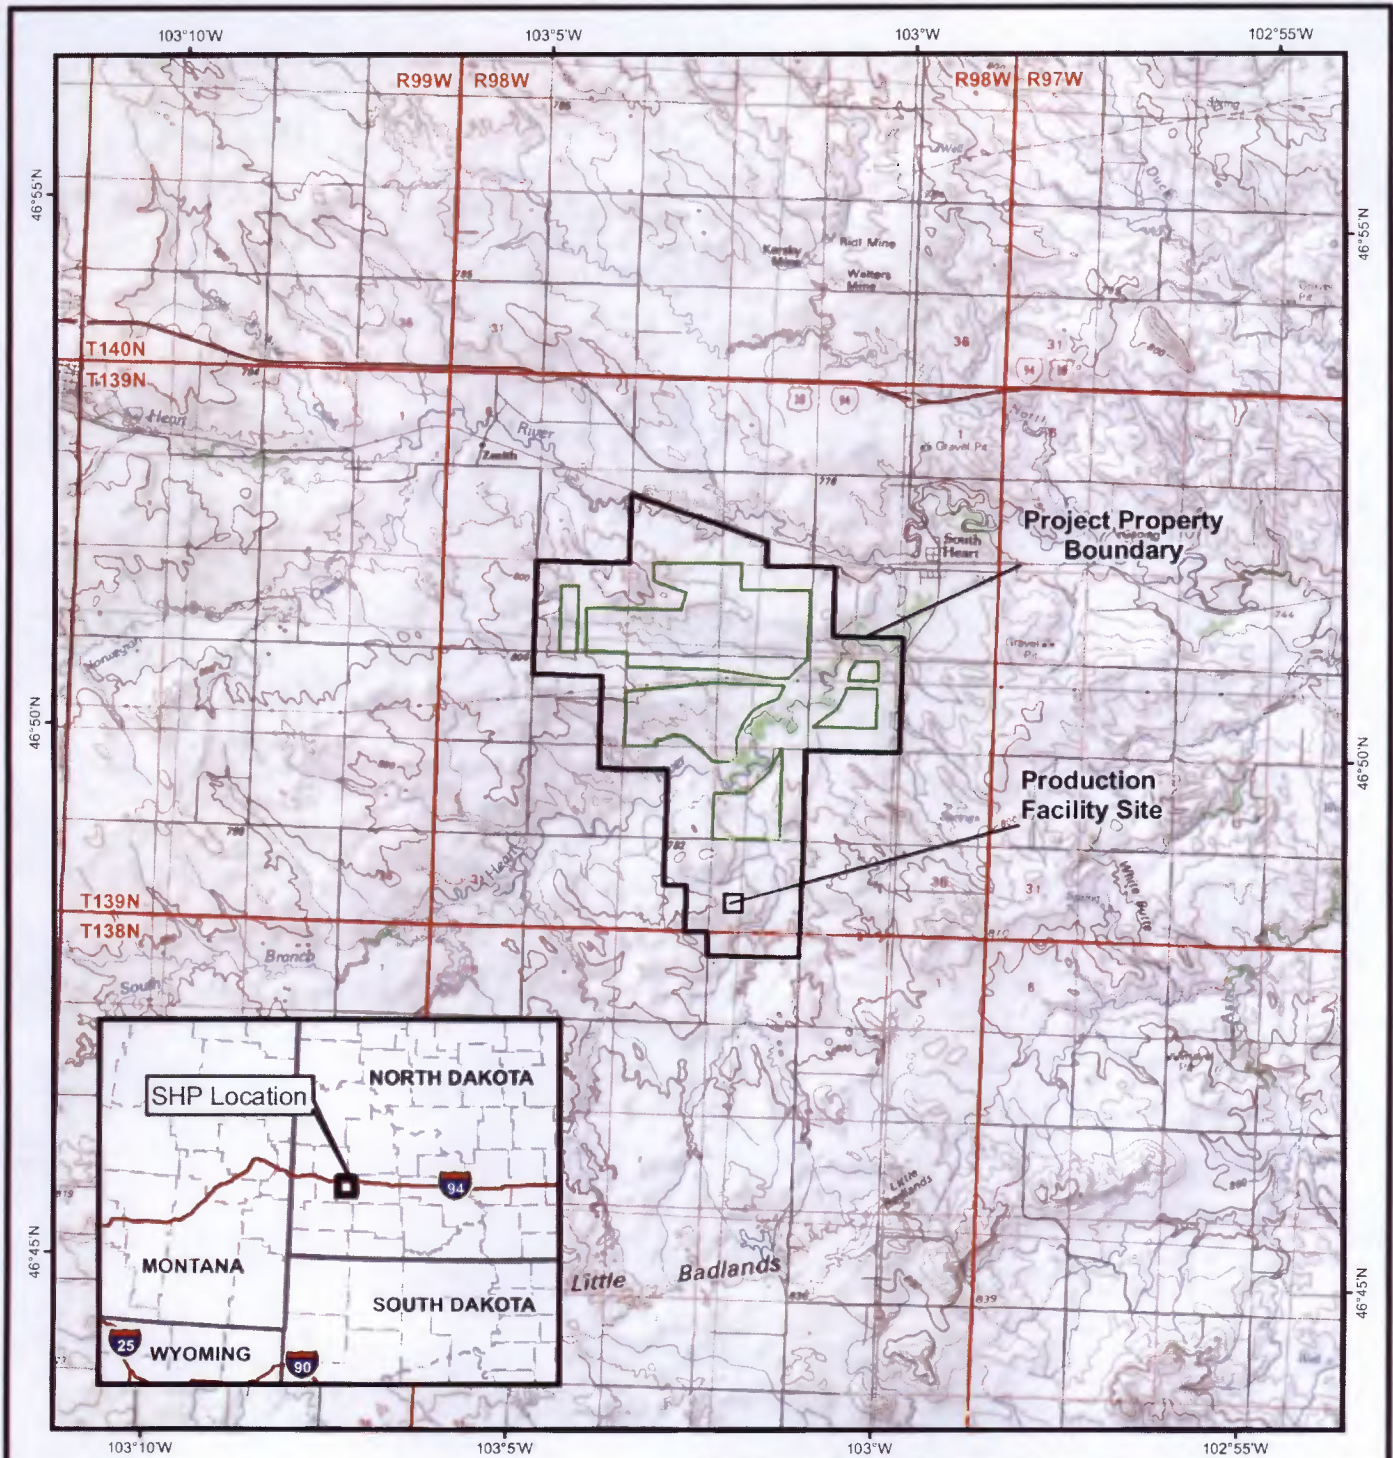

Sincerely,

Richard A. Southwick  
Manager – Permitting & Environmental
