Subject: Tank Information

Paul,

Thanks for agreeing to forward the information (possibly on disk) on the new tank to our office. We will review the information and get back to you with the capacity. As I said in our phone conversation, we need to get this taken care of as soon as possible.

We often find that the capacities provided by the contractor's is usually less than our measured capacity. Part of the reason for this may be that I don't believe contractors take pack into consideration when determining the size of a tank/bin. Pack is taken into consideration when measuring (determining the size) of facilities. I am sure you would find that if CCC were to measure the tank, they would arrive at a capacity very similar to ours.

You mentioned you disagree with and challenge our calculations. If you chose to go this direction, you must put this in writing and forward to the Commission. Either way, this matter needs to be addressed immediately in order for Beach Cooperative Grain to remain in compliance with state law. Thank you for your cooperation and I look forward to hearing from you soon.

Sue Richter, Licensing Division Director
