3.2 Features

3.2.1 General

The following features will be available on all lines. Not all features are compatible with certain key sets and PBX systems.

A. Call Forward

This optional feature allows all calls directed to a telephone number to be routed to a user defined telephone number. The user is charged any applicable usage charges for the re-routed call. The user can activate/deactivate Call Forward and define a telephone number where all calls will be forwarded. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number.

B. Call Forward Busy Line

This optional feature forwards calls to a busy station to a predetermined number. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number. The user is charged any applicable usage charges for the forwarded call.

C. Call Forward Don't Answer

This optional feature allows users to re-route a call to a predetermined station in the event that the call is not answered within a customer-specified number of rings. Users are charged for any applicable usage charges on the forwarded call.

D. Call Return

Allows a customer to automatically redial the telephone number of the last incoming call to that line, regardless of whether the call was answered, unanswered, or busy. After the recall is activated, and unless the number is blocked as described below, an announcement of the number is provided to the customer, who then has the choice of either continuing the recall by entering a code, or terminating the recall by hanging up. If the redialed number is busy, a distinctive ring alerts the customer when the number becomes available. If the telephone number of the last incoming call has been blocked through the use of a service such as Caller ID Blocking, the number cannot be redialed.

SECTION 3 - SERVICE DESCRIPTIONS, (CONT'D.)

3.2 Features, (Cont'd.)

The original party can then leave the call without disconnecting the other parties. Calls can be transferred to any number in the North American Dialing Plan (I-NP A-NXX-XXXX type numbers).

G. Call Waiting

Provides a tone to notify customer on an existing call that a second call is waiting.

H. Caller ID

Hunting will not work with Call Forward Busy and Don't Answer

N. Three Way Calling

Allows a user to add a third party to an existing conversation without expensive conferencing equipment. 3.10 Direct Inward Dial (DID) Service¹

3.10.1 DID Service is an optional feature which can be purchased in conjunction with Company-provided PBX trunks. DID Service transmits the dialed digits for all incoming calls allowing the Customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID central Office termination and DID number blocks apply in addition to charges specified for PBX Trunks. One additional termination charge applies for each DID equipped PBX Trunk. Telephone numbers are furnished in blocks of 20. Blocks of number groups will be determined at the sole discretion of the Company's resources. Whenever possible, the Company will attempt to provide telephone numbers arranged consecutively in a group, but will not guarantee nor accept responsibility for provision of such an arrangement within or between a block of numbers. In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine efficient telephone number utilization. The Company will not terminate these numbers to an intercept message on the Customer's behalf.

SECTION 3 - SERVICE DESCRIPTIONS, (CONT'D.)

3.12 Measurement of Service

3.12.1 When charges for calls are mileage sensitive, airline mileage is computed as described below. Calls are measured and rounded to the higher full minute from the serving wire center of the Customer's originating location to the serving wire center of the destination of the call, regardless of Company routing. The distance between the serving wire center origination point and that of the destination point is calculated by using the "V" and "H" coordinates as defined by Bell Communications Research (BellCore) and NECA Price List FCC No. 4 in the following manner:

Step 1 Obtain the "V" and "H" coordinates for the originating and terminating wire centers.

Step 2 Obtain the difference between the "V" coordinates of each of the serving wire centers. Obtain the difference between the "H" coordinates.

Step 3 Square the differences obtained in Step 2.

Step 4 Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 Divide the sum of the squares obtained in Step 4 by ten (10). Round to the next higher whole number, if any fraction results.

Step 6 Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number, if any fraction is obtained. This is the airline mileage of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

7.2.1 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 4.1.1** Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 4.1.2** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 4.1.3** Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

The credit is applied only once to the Customer's next scheduled bill and expires with that bill. The credit does not apply separately for interstate or intrastate service and cannot be redeemed for cash.

7.2.3 Network Exchange Bundled Service

A. General

Trinsic offers basic local exchange service only as part of a bundle or package of telecommunications services. All packages include local service, long distance service (interstate and intrastate toll) and selected custom calling features. Voice Mail and Optional Internet access¹ may be available with some packages at an additional charge. The aforementioned services are only available as part of the bundled service offering and are not available on an individual service basis. Customers will be billed directly by the Company.

The Company provides Customers with the option of obtaining a Primary Line and Secondary Line per account:

1. Primary Line

The initial residential local exchange access line per account.

2. Secondary Line

The second or additional residential local exchange access line, billed to the same address as the Primary Line, the Secondary Line will share the monthly call allowance with the Primary Line. The Secondary Line does not automatically include or share any Custom Calling Features. Feature packages may be purchased separately.

Should a Customer with both lines opt to disconnect the Primary Line, the remaining Secondary Line will automatically convert to a Primary Line with all features and functionality of such, and at the Primary Line monthly recurring rate.

¹ Voice mail and Internet access are not regulated by the Commission.

SECTION 7 - TRINSIC PRODUCTS, (CONT'D.)

7.2 Basic Services and Rates, (Cont'd.)

7.2.3 Network Exchange Bundled Service, (Cont'd.)

A. General, (Cont'd.)

Network Exchange Bundled Service may include the calling features listed below:

These features are offered subject to availability of suitable facilities. Certain features may not be available with all classes of services.

In the event Trinsic adds custom calling features to its Network Exchange Bundled Services, such features will be available upon the tariff effective date (where technically feasible) to all new Customers. Existing Customers will be informed of the new features availability but must contact the Company to obtain the new features. Any Service Order Charges, which would normally apply, will be waived.

Call Forwarding - Fixed, Busy Line No Answer - This feature, when activated, redirects attempted terminating calls to another Customer-specified line. Call originating ability is not affected by Call Forwarding - Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding - Fixed, Busy Line No Answer is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Caller ID with Name - Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the Company. It is the responsibility of the Customer to provide the necessary CPE. In areas where Caller ID with Name is not available, Caller ID, which only displays the incoming telephone number, will be substituted.

SECTION 7 - TRINSIC PRODUCTS, (CONT'D.)

7.2 Basic Services and Rates, (Cont'd.)

7.2.3 Network Exchange Bundled Service, (Cont'd.)

A. General, (Cont'd.)

Network Exchange Bundled Service may include the calling features listed below, (cont'd.):

Call Forwarding - Variable - a Customer activated feature that automatically transfers all incoming calls from the Customer's telephone number to another dialable telephone number until the Customer deactivates the feature. If forwarded to a long distance number the Subscriber will incur the long distance charges.

Call Trace - Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company for action. The Customer originating the trace will not receive the traced telephone number. The results of the trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them.

Call Blocking- Call Blocking allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring. The screening list may be edited and revised at Customer's discretion.

7.2 Basic Services and Rates, (Cont'd.)

7.2.3 Network Exchange Bundled Service, (Cont'd.)

A. General, (Cont'd.)

Network Exchange Bundled Service may include the calling features listed below, (cont'd.):

Distinctive Ring: Distinctive Ring is a feature that allows a Customer to have up to two separate phone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on an incoming call to allow for identification of the number being called. A distinctive call waiting tone is also provided for each telephone number, where facilities permit and Customers subscribe to Call Waiting. Distinctive Ring is offered subject to availability of suitable facilities.

VIP Alert - Allows a customer to program telephone numbers of selected callers, enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone.

Privacy Service- A feature which intercepts calls that are marked "private" and "out of area," or "unavailable" on Caller ID units. When unidentified callers dial the Subscriber's number, they will receive an announcement informing them that the party they are calling does not accept calls from unidentified callers. They will receive a prompt to identify their name or state their intention and the service will then attempt to connect the call. Only if the caller responds will the call be connected.

The Subscriber's Caller ID will display the platform number and the name of the service. If the Subscriber chooses not to take the call the caller will hear a message which states the Subscriber is unavailable.

Privacy Service is offered subject to availability of suitable facilities. This service will be provisioned on a line-by-line basis and Customers with more than one line would need to have the service activated on each line if they want the ability to intercept unknown and blocked calls to each line.

SECTION 7 - TRINSIC PRODUCTS, (CONT'D.)

7.2 Basic Services and Rates, (Cont'd.)

7.2.3 Network Exchange Bundled Service, (Cont'd.)

A. General, (Cont'd.)

Call Waiting with Caller ID with Name - Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller's name and number previewed on a display screen allowing a Customer to prioritize and or screen incoming calls. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. In areas where Caller ID with Name is not available, Caller ID, which only displays the callers telephone number, will be substituted.

Speed Calling - This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

The Customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedure. Call originating ability is not affected by Call Forwarding-Fixed. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding-Fixed is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Speed Calling - This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in an 8 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Caller ID - Allows a Customer to see a caller's telephone number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE.

5. Calling Features, (Cont'd.)

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. Customers must actively choose this feature on a line-by-line basis. Call Waiting is not available on lines enabled for Rotary Hunting.

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

Hunting - Routes a call to an idle station line in a prearranged group when the called station line is busy. This feature is available at no charge but must be requested by the Customer.

Distinctive Ring: Distinctive Ringing is a feature that allows Customer to have up to two separate phone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on an incoming call to allow for identification of the number being called. A distinctive call waiting tone is also provided for each telephone number, where facilities permit and Customers subscribe to Call Waiting. Distinctive Ring is offered subject to availability of suitable facilities.
