Patrick Fahn,
Darrell Nitschke

Xcel Energy is committed to operating a safe, reliable natural gas system. As part of its regular maintenance process, the Company plans to replace all the Century Pipe from our North Dakota natural gas system. Xcel Energy will meet a project completion date of 2010 or sooner. Xcel Energy is available to provide additional details on the implementation plan as it is finalized, and would be open to reporting on our progress as this project is implemented, as the Commission desires.

Please distribute to Commissioners and staff as appropriate:
