

ANNUAL REPORT TO THE NORTH DAKOTA PUBLIC SERVICE COMMISSION ESSENTIAL TELECOMMUNICATIONS CARRIER CERTIFICATION

The undersigned, on behalf of the telecommunications company named below (the Company), does hereby state and certify, as follows:

1. The Company will provide service on a timely basis to requesting customers within the Company's designated service area where the Company's network already passes the potential customer's premises, and
2. The Company will provide service, within a reasonable period of time, if the potential customer is within the company's designated service area but outside the Company's existing network coverage, if service can be provided at a reasonable cost.
3. The Company is able to remain functional in emergency situations and has a reasonable amount of back-up power to ensure functionality without an external power source.
4. The Company is satisfying and will satisfy applicable consumer protection and service quality standards.
5. If the company is a non-incumbent local exchange carrier, it will offer a local usage plan comparable to the one offered by the incumbent local exchange carrier in the designated service area.
6. The Company acknowledges that the North Dakota Public Service Commission (the Commission) may require it to provide equal access to long distance carriers in the event that no other eligible telecommunications carrier is providing equal access within the proposed designated service area.
7. The Company has met and will meet the requirements of eligible telecommunications carrier advertising.

Attached hereto as "Exhibit A" is information indicating "Year 2007 Federal Universal Service Receipts" received by the Company. This same Exhibit also shows total expenditures of the Company in 2007 related to the provision, maintenance and upgrading of the facilities and services that are supported by Federal Universal Service Funding and further estimates these same expenditures for calendar year 2009. Consistent with federal universal service principles, the Company will use federal universal service amounts received in 2009 to offset a portion of these 2009 expenditures. This use of federal universal service support will enable the Company to: (1) maintain rates for its local exchange services that are affordable and reasonably comparable to rates being charged for the same services in urban areas; and (2) to

upgrade its telecommunications facilities and equipment as necessary to meet evolving service requirements and maintain high quality service. The use of federal universal service support for these purposes is clearly consistent with the federal universal service provisions. In addition to the information included in Exhibit A, the following information is provided to meet the Commission's "Certification requirements":

- The Company's service quality improvement plan is to continue to upgrade its telecommunications facilities and equipment as necessary to meet evolving service requirements and maintain high quality service throughout its service area. As an incumbent local exchange carrier and the carrier of last resort in its service area, the Company upgrades and replaces facilities and equipment as necessary. The Company believes that its planned capital additions will improve the reliability of switched calls for its customers, increase the Company's network capacity to serve remote customers and provide customers with state-of-the-art telecommunications service. In furtherance of its service quality improvement plan, the Company will use any high-cost universal service mounts received by it to offset expenditures incurred as it continues to upgrade and replace facilities and equipment. A progress report on the Company's two-year service quality improvement plan is attached hereto as "Exhibit B."
- During calendar year 2007, the Company experienced no service outages affecting at least 10 percent of its end user customers, for a period lasting longer than 30 minutes. The Company was able to provide service to all potential customers that requested service during 2007, and as of December 31, 2007, the Company had no unfulfilled requests for service.
- During 2007, the Company's customer service department received no formal complaints from consumers.

I hereby certify that the above information is true and correct and is submitted on behalf of the Company named below. The information is submitted in the year 2008.

James Valley Telecommunications
Company

By: James Shoft

Title: CEO

**EXHIBIT A
James Valley Cooperative Telephone Company**

Year 2007 Federal Universal Service Receipts:

Total	<u>\$3,538,088</u>
Total Supported Expenditures, Before Return on Investment	<u><u>\$7,723,155</u></u>

North Dakota Data:

Based on the small size of the Company's customer base in North Dakota, it would be difficult to detail the specific USF dollars received as well as cost incurred solely in North Dakota. Therefore, the above data encompasses all of the Company's serving area with our ND customers being served in the same manner as our entire service territory.
