Jerry,

Sequoia has heard from MISO on the project's transmission studies. The impact study and the facility study should be done by August. Sequoia will then have up to 60 days to proceed with the interconnection. Sixty days from receipt of MISO's information will put a hearing date for the Border Winds project into November 2009. I know we had discussed an August date for the hearing and this will of course need to be adjusted. If it is not too early, can you please schedule a hearing date for November 2009 at the next Commissioner's meeting.

Thank you for your time and attention to this matter. Please do not hesitate to contact me should you have any questions.

Sincerely,

Amy Linnerooth  
Environmental Scientist
