Subject: Request for Rail Clearance Variation in Ray, ND.
Attachments: IMG_0601.JPG

Hello Annette,

Attached is a photo of the railroad tracks and an existing No Clearance sign in Ray, ND.

Where you see the no clearance sign, the proposed fall protection would start straight across the tracks (in between the two spur lines) from the No Clearance sign and go 180 feet and end where you see the edge of the larger warehouse.

Thank You
Mike LaBere
