**PUBLIC SERVICE COMMISSION**

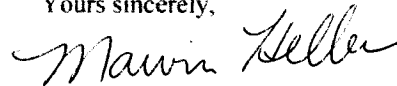

To Whom It May Concern:

Topic: Pecan Pipeline (Prairie Rose Pipeline Project)

We received your request for input on your proposed project. It looks like it will fall under are conditional permit process which entails these items:

1. Need to have verification on all right of way for signing and safety guaranteed by the contractor and that the road will be left in the same manner as found.
2. All approaches will have a 3 to 1 slope and will not impede any water you make for access
3. Instead of notification of all adjacent land owners a copy of easement will do.
4. All natural drainage will be mitigated to not impede water flow during construction
5. Need to guarantee their will be no future road damage as to settling of road bed. And will repair such on request.
6. Permits are good for one year and a certificate of compliance is need when done with our area.

Yours sincerely,

Marvin Heller, President

PS; cc to ND Public Service Commission
