Coverage under the 2009 reissued construction general permit (NDR10-0000) is identified as follows:

Permit ID: NDR103014 Site Name: Hawthorn 8" Crude Oil Transmission Pipeline & 4" NGL Pipeline

Please remember to update the Stormwater Pollution Prevention (SWPP) plan as appropriate for site conditions. The best management practices (BMPs) and temporary structures must be inspected, maintained and adjusted until the site is stabilized following construction activities. Once the site is stabilized as outlined in the general permit, you may end permit coverage by filing a termination notice. Permit coverage remains active until you submit a termination notice. Cities or counties may impose additional requirements and/or specific BMPs for construction affecting their storm drainage system. Please check with the local officials to be sure all local stormwater management considerations are addressed.
