5. Program Narrative

The AML Division estimates that approximately \$3,000,000 will be spent for major construction projects at abandoned coal mines during the grant period. The following sites are proposed for reclamation during the 2010 construction season:

Buechler/Velva – Phase 1: This project involves the elimination of approximately 2 miles of hazardous highwalls in an abandoned surface mine south of Sawyer in Ward County. This AML site is characterized by unstable highwalls that are more than 75 feet high in some areas and most of the surrounding area is cropland. The proposed reclamation work involves backfilling the highwalls with material from adjacent spoil piles. A preliminary cost estimate for this project is about \$2,100,000.

Beulah/Zap – Phase 11: Proposed reclamation will involve drilling and pumping pressurized grout into collapsed underground mine workings located beneath areas near Beulah and Zap. The Beulah/Zap, Phase 11, project will consist of rotary drilling, casing drill holes where voids are found, the pumping of grout, and the testing of grout. The project will include areas along State Highway 200 and county roads near Beulah and Zap. The preliminary cost estimate for this project is approximately \$750,000.

Williams County Road 9 – Phase 5: Proposed reclamation will involve drilling and pumping pressurized grout into collapsed underground mine workings located beneath areas near Williston. The Williams County Road 9, Phase 5, project includes the pumping of grout into cased drill holes and the testing of grout. It may also include some additional rotary drilling to locate underground mine voids. The project will include areas in and near the Grandview Subdivision and Williams County Road 9. The preliminary cost estimate for this project is approximately \$300,000.

Although most of the 2010 construction costs will be paid from the 2010 grant, some of these costs will be paid with the remaining funds in North Dakota's 2009 construction grant. Some of the 2010 construction funds, estimated at \$200,000, will be used for maintenance work on reclaimed sites and to backfill hazardous sinkholes, for exploratory drilling in areas where abandoned underground coal mines are located. About \$50,000 will be used for the preparation of topographic maps at a large surface AML site. In addition, the grant application includes \$100,000 for construction work at abandoned coal mines that are declared emergency projects.

2010 ADMINISTRATIVE AND CONSTRUCTION ACTIVITIES - OBJECTIVES AND NEED FOR THIS ASSISTANCE

This Grant will fund the administration and implementation of the approved North Dakota Abandoned Mine Lands Reclamation Program from March 1, 2010 to February 28, 2013.

The objectives for this grant are:

- Fund project design and engineering, NEPA compliance, cultural resources (Section 106 Compliance), and site monitoring;
- Keep the “Standard Specifications for AML Reclamation Projects” current;
- Cover any amendments to our State Program that might be warranted;
- Continue to add all abandoned coal mines not yet on file into our inventory;
- Be repository for information regarding abandoned mine related injuries and deaths;
- Investigate and design all new coal-related AML projects;
- Fund salaries for North Dakota AML personnel;
- Perform necessary travel to conduct state business, meet with OSMRE personnel, attend national conferences and meetings related to abandoned mine land reclamation;
- Fund travel for construction site inspections and site investigations;
- Obtain equipment necessary to efficiently implement the State AML Program;
- Continue to update position descriptions for each employee;
- Conduct staff performance appraisals once every twelve months;
- Contract for title memoranda and make eligibility determinations for abandoned coal mine sites;
- Contract for construction services on eligible and approved abandoned mine land sites; and,
- Continue development of the Geographic Information System (GIS) for AML sites and projects.

RESULTS OR BENEFITS EXPECTED FROM THESE OBJECTIVES

The North Dakota Public Service Commission AML Division, by operating under these objectives, will fulfill obligations to abate present hazards to public health, safety and general welfare and to the environment that presently exists because of abandoned mines in North Dakota. The AML Division will provide necessary reclamation planning specific to North Dakota's needs. All North Dakotans will benefit from this assistance by providing a safer and cleaner environment for everyone's enjoyment. The economy will benefit from jobs created through expenditures under this program. Documentation of available information for AML sites will benefit the public at large.

APPROACH

- a. The North Dakota AML Program, administered by the North Dakota Public Service Commission, will use staff expertise to identify, monitor, propose and design reclamation projects. Reclamation construction will be engaged through contracts with construction contractors who are qualified to complete approved coal reclamation and maintenance construction projects. The administration of these projects, as well as the \$100,000 emergency program, will be borne by this Consolidated Grant. The AML Division will contract for services or perform the following work:
 - Cultural resource evaluations and NEPA compliance;
 - Title searches, landowner right-of-entry acquisition, and eligibility determinations; and,
 - Development of construction design and specifications for individual project sites.
- b. The fieldwork for the following studies may be undertaken during the 2010 field season:
 - Cultural resource surveys;
 - Ground water and surface water monitoring;
 - Laboratory work, including analysis of soil, water and grout mix samples before, during and after reclamation; and,
 - Aerial photogrammetry.
- c. Data to be collected:
 - Cultural, historical and archeological resources;

- Environmental assessment, investigation and analysis;
 - Ground and surface water analysis;
 - Soil/grout mix testing;
 - Surface ownership documents; and,
 - Aerial photogrammetric surveys, including development of topographic maps.
- d. Experienced and competent firms will be awarded contracts for the following work:
- Cultural and historic resource survey work;
 - Aerial photogrammetry;
 - Title evaluations; and,
 - Construction services on approved abandoned mine sites.

Firms will be chosen according to established state procurement procedures. Firms selected will be awarded contracts funded by this Consolidation Grant.

GEOGRAPHIC LOCATION

The North Dakota Public Service Commission is located in Bismarck, North Dakota with reclamation projects in the western half of the State.

BUDGET NARRATIVE

ADMINISTRATIVE

I. PERSONNEL

The North Dakota Public Service Commission (PSC) will use 2.25 full-time equivalents (FTE) to administer the approved North Dakota Abandoned Mine Lands (AML) Reclamation Program for the 12-month administrative grant period. It is projected a PSC attorney will devote about five percent of their time to legal work associated with the AML program and that time will be a direct charge to the grant. Table 3, lists each position by title and shows the annual salary and fringe benefit rate for each employee. Total salaries and fringe benefits for the administrative grant are budgeted at \$209,901.

II. FRINGE BENEFITS

The estimated fringe benefit costs for 2.25 positions for the 12-month administration period are \$55,562. Included under fringe benefits are: workers compensation, state retirement, FICA, hospital insurance, unemployment insurance, vacation, sick, jury, military and emergency leave. Table 3 provides the estimated fringe benefit costs by position. The fringe benefit rate averages 36 percent of the direct salaries.

III. TRAVEL

The AML Division estimates \$8,500 in travel expenditures for the administrative portion of the grant. These anticipated expenditures include staff travel to NAAML and IMCC meetings, other conferences, and in-state travel to AML sites by management staff.

The budget for meals and lodging costs is \$3,500. The State of North Dakota has established travel policies for meal and lodging reimbursement. In-state rates for meals are \$25.00 per day and \$63.00 plus applicable tax per night for lodging. Out-of-state rates for meals are based on federal rates and lodging at actual cost.

Anticipated air transportation costs of \$3,500 are budgeted for trips to NAAML and IMCC meetings, other conferences and training seminars.

Motor pool costs for the administrative grant year are estimated at \$1,500, primarily for in-state travel to AML sites by management staff. The AML Division

normally uses vehicles owned by State Fleet Services. The PSC pays a mileage rate that consists of operating costs and depreciation. Operating costs include: repair parts, fuel, insurance, licenses, direct labor, and shop overhead. Vehicle replacement charges by State Fleet Services are not charged against the grant and are paid for with state funds. Depreciation is the actual cost less salvage value of the vehicles in the fleet spread over the estimated useful life of the vehicle. In case a privately owned vehicle is approved for use to conduct state business, the mileage reimbursement cannot exceed that set by state law.

IV. EQUIPMENT

The Federal Assistance Manual's definition of equipment is tangible, personal property having a useful life of more than one year and an acquisition cost of \$5,000 or more per unit. An equipment purchase of not more than \$36,000 is anticipated during the administrative grant year. A new borehole camera is planned for purchase during the grant period.

V. SUPPLIES

The Abandoned Mine Lands Division has estimated \$20,750 for the budget category "Supplies."

Reproduction/Printing costs are estimated at \$750, expenditures include: printing of bid documents, maps and plats, contract reporting forms, and ND Abandoned Mine Lands Reclamation Rules.

Office supplies and equipment are estimated at \$1,500.

The amount allocated toward Specialized Technical and GIS Software is \$3,500 and that will be used for specialized software that may be needed to support the ongoing development of a GIS and other needs specific to the AML program.

Expenditures of \$5,000 are anticipated for purchases of images for use in the GIS, engineering supplies, tool kits, hard-hats, steel-toed boots, stakes, ribbons, spray paint, and wet weather gear.

The estimated costs of specialized IT equipment, such as tablet PC's, GPS units, digital cameras, etc. is \$7,500.

Miscellaneous supplies are budgeted at \$2,500 during this grant period and include books, periodicals, technical subscriptions, and engineering equipment.

VI. OTHER

The AML Division has estimated \$46,750 for the budget category "Other." Postage is estimated at \$750, and advertising (public notices) is \$2,500.

The cost of office rent in the Capitol for AML staff is estimated at \$15,000.

AML staff will be given the opportunity to participate in technical conferences and training seminars relative to each individual staff person's expertise. Registration and tuition costs for these conferences and seminars are estimated at \$3,000 for this grant period.

Equipment rental is \$500, which includes equipment rental by the AML Division, such as metal detectors to find previously cased holes.

Also included is \$8,000 for costs of miscellaneous fees and services such as freight, water and soil sample analyses, and items not otherwise classified.

Central service costs charged by the State Office of Management and Budget and the cost of the next federal financial and compliance audit of North Dakota's AML program grants is estimated at \$5,000. The State Auditor's Office will perform the audit service.

The AML Division's share of North Dakota's membership in the Interstate Mining Compact Commission is approximately \$7,000.

The estimated cost of four cell phones used by AML construction project staff to communicate with office staff and others while in the field and air cards for mobile computers is \$2,500.

The estimated cost of miscellaneous repairs is \$2,500 and this is also included in the "Other" category.

Several years ago, the PSC moved data processing services and telephone services to general office expenses. In addition, the PSC has also moved copier charges to general office expenditures. These costs are part of the indirect cost rate so no direct charges will be made to the grant for data processing services, telephone services or copier charges.

VII. TOTAL DIRECT COSTS

Total direct costs are \$321,901 for this grant period.

VIII. INDIRECT COST

The approved indirect cost rate through June 30, 2011 is 35.73%. Total indirect costs for the administrative grant are estimated at \$74,998.

TOTAL COSTS

The total estimated budget for the 2010 AML North Dakota Reclamation Program Administrative Grant is \$396,899.

PROGRAM INCOME

No program income is expected during the grant period since the AML Division no longer charges potential bidders for copies of the bid plans and specifications. Most potential bidders are now able to view and download the project plans and specifications from the State Procurement Office's website.

BUDGET NARRATIVE - CONSTRUCTION

I. PERSONNEL and FRINGE BENEFITS

The PSC will use 3.4 full-time equivalents (FTE), including two seasonal construction inspectors, for construction projects during the 36-month grant period. Table 3 lists each position by title and shows the annual salary and fringe benefit rates for each employee during the first year of the grant. The fringe benefit rate for permanent full time employees averages 36 percent of the direct salaries and the fringe benefit rate for the seasonal construction inspectors is 20 percent. Total salaries and fringe benefits for the construction project staff is \$272,203 and indirect costs are estimated at \$97,258.

II. TRAVEL

The AML Division estimates approximately \$70,000 in travel expenses for construction projects. These anticipated expenditures are for staff travel to project sites during construction activities.

The budget for meals and lodging costs is \$25,000. The State of North Dakota has established travel policies. In-state rates for meals are \$25.00 per day and \$63.00 plus applicable tax per night for lodging. State motor pool expenses are estimated at \$45,000 for project related work.

III. CONSTRUCTION PROJECTS

The AML Division estimates that \$2,362,337 will be available for major construction projects at abandoned coal mines for the grant period. The following sites have been proposed for reclamation during the 2010 construction season:

Buechler/Velva – Phase 1: This project involves the elimination of approximately 2 miles of hazardous highwalls in an abandoned surface mine south of Sawyer in Ward County. This AML site is characterized by unstable highwalls that are more than 75 feet high in some areas and most of the surrounding area is cropland. The proposed reclamation work involves backfilling the highwalls with material from adjacent spoil piles.

Beulah/Zap – Phase 11: Proposed reclamation will involve drilling and pumping pressurized grout into collapsed underground mine workings located beneath areas near Beulah and Zap. The Beulah/Zap, Phase 11, project will consist of rotary drilling, casing drill holes where voids are found, the pumping of grout, and the testing of grout. The project will include areas along State Highway 200 and county roads near Beulah and Zap.

Williams County Road 9 – Phase 5: Proposed reclamation will involve drilling and pumping pressurized grout into collapsed underground mine workings

located beneath areas near Williston. The Williams County Road 9, Phase 5, project includes the pumping of grout into cased drill holes and the testing of grout. It may also include some additional rotary drilling to locate underground mine voids. The project will include areas in and near the Grandview Subdivision and Williams County Road 9. (Phases 1 through 4 have been completed except for some minor cleanup associated with Phase 4.)

Some of the construction funds, an additional \$200,000 will be used for maintenance work on reclaimed sites and to backfill hazardous sinkholes and conduct exploratory drilling at abandoned underground coal mines. About \$50,000 will be used for the preparation of topographic maps at the Columbus AML site.

Emergency Projects

This grant application requests \$100,000 for construction work at abandoned coal mines that are declared as emergency projects.
