RE: COST OF GAS RIDER CHANGE (“COG”)

Executive Secretary:

Xcel Energy is filing this COG for gas used on and after September 1, 2010.

The attached schedules show the new gas cost supporting worksheets and applicable pipeline tariff sheets. The net effect of the COG is a decrease to the Residential rate by \$0.0816 per therm from the August COG gas rate, 16.83%, or \$1.39 for a typical September North Dakota Residential customer using 17 therms. Compared to August, the Commercial/Industrial price is 14.74% lower and the Interruptible prices are 19.00-20.34% lower.

The decrease is a result of decreased commodity costs. The commodity costs decreased due to the rig count remaining steady, extreme weather diminishing, and low threat of severe tropical weather patterns. Compared to last September, prices are 21-36% higher.

The 2009 – 2010 Annual True-up of Gas Costs and Automatic Annual Adjustment report are being filed concurrently with the COG. The true-up factors are higher for the Residential and Commercial/Industrial classes and lower for the interruptible classes. This moderately affected the gas costs; higher for Residential and Commercial/Industrial classes, and lower for the interruptible classes.

The cost of gas rates for September are as follows:

<u>Customer Class:</u>	<u>\$/therm</u>
Residential	\$0.40331
Commercial/Industrial	\$0.40706
Small & Large Interruptible	\$0.36346

Please contact me at (612)330-6613 or Martha Miller at (612)330-5973 if you have any questions.

Sincerely,

/s/
