RE: COST OF GAS RICER CHANGE (“COG”)

Executive Secretary:

Northern States Power Company, a Minnesota corporation (“Xcel Energy” or the “Company”) is filing this COG for gas used on and after November 1, 2010 in North Dakota.

The attached schedules show the new gas cost supporting worksheets and applicable pipeline tariff sheets. The net effect of the COG is an increase to the Residential rate by \$0.02955 per therm from the October COG gas rate, 6.88%, or \$2.66 for a typical November North Dakota Residential customer using 90 therms. Compared to October, the Commercial/Industrial price is 5.46% higher and the Interruptible prices are 6.94-7.51% lower.

The increase to Residential and Commercial/Industrial customers is due to winter demand rates going into effect. It was tempered by a decrease in commodity costs. The commodity costs decreased due to large amounts of gas in storage and limited threat of severe weather near production areas. Compared to last November, Residential and Commercial/Industrial prices are 19-22% lower.

The Interruptible class does not have summer/winter demand rates. The decrease to those customers is due to decreased commodity costs. As above, the commodity costs decreased due to large amounts of gas in storage and limited threat of severe weather near production areas. Compared to last November, Interruptible prices are 26-27% lower.

The cost-of-gas rates for November are as follows:

<u>Customer Class:</u>	<u>\$/therm</u>
Residential	\$0.45901
Commercial/Industrial	\$0.46276
Small & Large Interruptible	\$0.35644

Please contact me at (612)330-6613 or Martha Miller at (612)330-5973 if you have any questions.

Sincerely,

/s/
