**Subject:** Ownership and Control updates

Gentlemen:

Attached please find the updated Ownership and Control for Revision 30 for your review. Please note that there was one change in the board of directors for BNI and two changes in the corporate officers for Allete. There also were surface and coal ownership changes made to Sections 20 and 21 prompting the update of the Legal and Financial Ownership Table and Plate 1-2 Ownership Map.

Jay will be dropping off an updated disc this afternoon at your office.

In your second technical review letter there was a paragraph indicating that a condition would be attached to the permit for the bookmarks to be completed in the lengthy appendices by the midterm review in 2013. The following is a copy of the technical and a response:

"As discussed during our December 1, 2010 meeting, we intend to attach a condition to Permit BNCR-9702 as part of the approval of Revision 30 to require that lengthy appendices, e.g., geologic and geophysical logs, be organized with bookmarks. We understand that such an effort is a time consuming process so we would not require its completion until the next midterm permit review in early 2013."

All of the appendices in BNCR 9702 have been bookmarked as requested, negating the reason for attaching such a condition.

Thank you. If you have any questions, please contact me at the Center Mine.

Remember, remember, September 11. One of the greatest atrocities in human history was committed against America.

No, do more than remember. NEVER forget!
