Dear Public Service Commissioners,

As a 3rd generation farmer and life long resident of North Dakota I am asking all of you with great respect to ^{2nd thing} ~~first~~

→ Deny the mining permit application from South Heart Coal. Inc.

because my main concerns (which has been for the last 7 yrs and not been addressed)
Water - my husband and I are farmers/ranchers there isn't any
Mercury - the past history (in SUND) speaks highly of the dangers/life long risks - the abundant supply has the potential to damage forever the #1 industry in ND agriculture

Our National Park

and ^{being} proud to be located so close to it having worked there as a youth the overall impacts both today and years down the road are EVIDENT

second and also →

To hold a formal public hearing

There are many generations that are and will be affected. Generations of individuals whom deserve a chance to express their view - the same people you represent and who's seat you occupy.
Regards
Nancy Eberts
