Dear ND Public Service Commission,

I am abhorred about this coal mine that might be built in South Heart. When I heard that the PSC deemed the application complete I decided to take action. As a resident of Finley, I hope and pray that we can save one of the last remaining beauty-filled and wildlife protected areas left- truly a beautiful National Park. This mine is going to just ruin everything that this park represents and stands for and majorly the purpose it was set aside for by our ancestors. With machines destroying the land just about 10 miles from the park-the toxic waste products, noise pollution and other pollutants being released into and onto our precious Mother Earth, once again an insult to her greatness and majesty-just another rape of her by the wealthy corporate giants. Just think of the impact that it will have on the park in more ways than one. I urge you to reject this out-of-state mine's application for many reasons.

I am a member of the University of North Dakota family, Department of Psychology. I have children and we care.

We are requesting a formal public hearing so we may voice our concerns.

Thank you

Sincerely,

Pauline Wolf
