

A Letter to the Public Service Commission

Thurs. Feb. 17, 2011

I am disturbed at the possibility of mining in the South Heart area. Upfront I am asking you to Deny a permit to allow mining in the South Heart area. I understand there may be uranium in The area to be mined. This is unacceptable. Uranium could endanger the health of the local Inhabitants. Uranium is a proven carcinogen and could be released into the air.

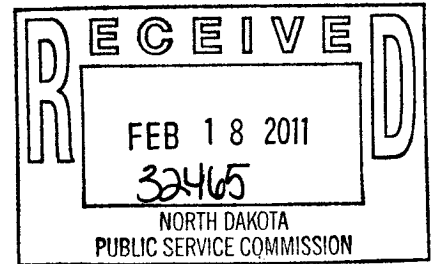

AT least, at least you could have a formal public hearing to discuss this issue.

Thank you for your consideration.

Sincerely,

Al Coen
