Bismarck, ND, 58505

Gentlemen,

I was disappointed to learn that the P.S.C. has accepted the South Heart Mining Permit application, and am writing to request that you set a formal hearing on this application and that the proceedings go on record.

I have many concerns. One of my greatest concerns is the presence of uranium in the proposed mine site. Uranium is a dangerous product and when released into the air it will result in dire health problems in the surrounding area - which includes Mercer County where I was born and raised. The mining permit application does not clarify this issue.

The application also pertains to many other issues which also need consideration, clarification, and study.

Again, I respectfully ask that you call a formal hearing to consider the South Heart Mining permit.

Sincerely,
Betty Morgan
