Subject: AVF data for South Heart

Mr. Southwick,

Attached is a copy of the letter we received from Plains Justice requesting additional information that is associated with the alluvial valley floor study for the proposed South Heart Mine, Permit Application SHSH-1001. Staff has reviewed this request and the information in the 2008 AVF study report prepared by Golder and we are requesting copies of the color and infrared photos referenced in the Golder report as well as the hourly ground water level data and related information that was used to produce the graphs that are part of the AVF report. We would appreciate receiving this information in an electronic format. This information will then be provided to Plains Justice.

Please contact me if you have any questions.
