RE: Response to MDU's Electric Tariffs Compliance Filing
Case No. PU-10-124

On June 14, 2011, Montana-Dakota Utilities Co. filed revised electric tariffs and supporting work papers in compliance with the Order issued by the commission on June 8, 2011. Staff has reviewed the billing determinants and the base cost of fuel calculations to assure that the resulting rates will increase revenues by the \$7,614,000 as authorized by the Order. Staff has also reviewed the language revisions to the tariffs and the various rate increase allocations to each customer rate class. Staff believes that MDU's filing complies with the commission's Order in all material respects. The advocacy staff recommends approval of the tariffs.
