Emergency
cy (FEMA)
ice to the
nt to reim-
cants for el-
r and/or re-
maged by

severe winter storm occurring April 1-3, 2010 and flooding beginning February 26, 2010, and continuing. This notice applies to the Public Assistance (PA) and Hazard Mitigation Grant Programs (HMGP) implemented under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5206.

Under a major disaster declaration (FEMA-1901-DR-ND) signed by the President on April 21, 2010, the following counties have been designated as adversely affected by the severe winter storm and eligible for Public Assistance: Adams, Benson, Burleigh, Grant, McHenry, McLean, Mercer, Morton, Oliver, Sheridan, Sioux and Wells Counties and the portion of the Standing Rock Sioux Indian Reservation that lies within the State of North Dakota. Additionally, all counties and Tribes in North Dakota have been designated as eligible for HMGP. Additional counties may be designated for assistance at a later date. Under a major disaster declaration (FEMA-1907-DR-ND) signed by the President on April 30, 2010, the following counties have been designated as adversely affected by the flooding and eligible for Public Assistance: Barnes, Benson, Cass, Dickey, Emmons, Foster, Grand Forks, LaMoure, Logan, Mercer, Morton, Nelson, Pembina, Ramsey, Ransom, Richland, Sargent, Steele, Stutsman, Traill, Walsh and Wells Counties and the portions of the Spirit Lake Reservation that lie within these counties. Additionally, all counties and Tribes in North Dakota have been designated as eligible for HMGP. Additional counties may be designated for assistance at a later date. This public notice concerns activities that may affect historic properties, activities that are located in or affect wetland areas or the 100-year floodplain, and critical actions within the 500-year floodplain. Such activities may adversely affect the historic properties, floodplains or wetlands, or may result in continuing vulnerability to flood damage. Presidential Executive Orders 11988 and 11990 require that all federal actions in or affecting floodplains or wetlands be reviewed for opportunities to relocate, and be evaluated for social, economic, historic, environmental, legal, and safety considerations. Where there is no opportunity to relocate, FEMA is required to undertake a detailed review to determine what measures can be taken to minimize future damages. The public is invited to participate in the process of identifying alternatives and analyzing their impacts. FEMA has determined that for certain types of facilities there are normally no alternatives to restoration in the floodplain/wetland. These are facilities that meet all of the following criteria: 1) FEMA's estimate of the cost of repairs is less that 50% of the cost to replace the entire facility, and is less than $100,000; 2) the facility is not located in a floodway; 3) the facility has not sustained major structural damage in a previous Presidentially declared flooding disaster or emergency; and 4) the facility is not critical (e.g., the facility is not a hospital, generating plant, emergency operations center, or a facility that contains dangerous materials, etc.). FEMA intends to provide assistance for the restoration of these facilities to their predisaster condition, except that certain measures to mitigate the effects of future disaster events may be included in the work. For example, a bridge or culvert restoration may include a larger waterway opening to decrease the risk of future washouts. For routine activities, this will be the only public notice provided. Other activities and those involving facilities that do not meet the four above criteria are required to undergo more detailed review, including study of alternate locations. Subsequent public notices regarding such projects will be published, if necessary, as more specific information becomes available. In many cases an applicant may have started facility restoration before federal involvement. Even if the facility must undergo detailed review and analysis of alternate locations, FEMA will fund eligible restoration at the original location if the facility is functionally dependent on its floodplain location (e.g., bridges and flood control facilities), or the project facilitates an open space use, or the facility is an integral part of a larger network that is impractical or uneconomical to relocated, such as a road. In such cases, FEMA must also examine the possible effects of not restoring the facility, minimize floodplain/wetland impacts, and determine both that an overriding public need for the facility clearly outweighs the Executive Order requirements to avoid the floodplain/wetland, and that the site is the only practicable alternative. The State of North Dakota and local officials will confirm to FEMA that proposed actions comply with all applicable state and local floodplain management and wetland protection requirements. FEMA also intends to provide HMGP funding to the State of North Dakota to mitigate future disaster damages. These projects may include construction of new facilities, modification of existing, undamaged facilities, relocation of facilities out of floodplains, demolition of structures, or other types of projects to mitigate future disaster damages. In the course of developing project proposals, subsequent public notices will be published, if necessary, as more specific information becomes available. The National Historic Preservation Act requires federal agencies to take into account the effects of their undertakings on historic properties. Those actions or activities affecting buildings, structures, districts, objects 50 years or older, or that affect archeological sites or undisturbed ground will require further review to determine if the property is eligible for listing in the National Register of Historic Places (Register). If the property is determined to be eligible for the Register, and FEMA's undertaking will adversely affect it, FEMA will provide additional public notices. For historic properties not adversely affected by FEMA's undertaking, this will be the only public notice. As noted, this may be the only public notice regarding the above-described actions under the PA and HMGP programs. Interested persons may obtain information about these actions or a specific project by writing to the Federal Emergency Management Agency, Joint Field Office, 600 South 2nd Street, Bismarck, ND 58504 or by calling (701) 323-3600. Comments should be sent in writing to Justo Hernandez, Federal Coordinating Officer, at the above address within 15 days of the date of this notice.

STATE OF NORTH DAKOTA
PUBLIC SERVICE COMMISSION
Enbridge Pipelines (North Dakota) LLC
Berthold Station Upgrades Siting Application
Case No. PU-10-130
NOTICE OF FILING AND NOTICE OF HEARING
May 18, 2010

On May 7, 2010, Enbridge Pipelines (North Dakota) LLC (Enbridge) filed a combined application for a certificate of corridor compatibility and a route permit to authorize construction for the expansion and upgrade of its existing Berthold Station in Ward County, North Dakota, as shown on the attached map. The Commission finds the combined application is complete. A Public Hearing on the combined application is scheduled to begin July 16, 2010 at 10:00 a.m. CDT, at the Berthold School, 401 4th Ave NE, Berthold, North Dakota, 58718. The issues to be considered are:

1. Will the location, construction, and operation of the proposed facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?

2. Are the proposed facilities compatible with the environmental preservation and the efficient use of resources?

3. Will the proposed facility locations minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?

For more information contact the Public Service Commission, State Capitol, Bismarck, North Dakota 58505, 701-328-2400; or Relay North Dakota, 1-800-366-6888 TTY. If you require any auxiliary aids or services, such as readers, signers, or Braille materials, please notify the Commission at least 24 hours in advance.
