Re: Case No. PU-10-130 – Enbridge – City of Berthold Zoning Permit

Dear Mr. Fahn

Enbridge has received the local zoning permit approval for the East 80 acre property from the City of Berthold as of October 4, 2010. This permit was needed for Enbridge to construct per the PSC Order Issued Case No. PU-10-130.

A pre-construction meeting was held August 26, 2010 with the PSC in attendance for an associated project at Enbridge's Berthold Station - Case No. PU-10-564 which references the PU-10-130 orders.

Enbridge plans to start construction immediately on this East 80 acre property. The same Enbridge engineering/construction team and contractors (Rooney Engineering, Gowan Construction, Elk Horne Construction) involved in the pre-construction meeting August 26 will work on the East property.

Enbridge, therefore, requests the PSC waive the need for another pre-construction meeting for the East 80 property scope of work. Please provide your acceptance of this request. If you should have any questions please let me know.

Respectfully Submitted,

Bruce Homeniuk
