RE: Gavilon Grain, LLC
Facility-Based Grain Buyer License – New Rockford

Gavilon Grain, LLC, Omaha, Nebraska, filed a license application to operate a grain warehouse at New Rockford under a facility-based grain buyer license. Construction of this new 1,990,000 bushel facility was recently completed. This Burlington Northern & Santa Fe Railway terminal will accommodate 120 cars and will handle corn, soybeans and wheat. The facility will have the capability of receiving 40,000 bushels of grain an hour and loading out 80,000 bushels of grain an hour.

All license requirements have been met. I recommend the request be approved. A corresponding motion and order are attached.
