Dear Mr. Frohlich:

The Reclamation Division has completed a technical review of Revision No. 26 to Permit KRSB-8802. This revision was submitted as a result of our pre-renewal review letter dated April 22, 2010. The following issues must be addressed prior to this office recommending approval of Revision No. 26 and Renewal No. 4 to the permit, which expires October 23, 2010. Please be advised that all active mining operations, including coal hauling, will need to cease within this permit if this revision is not approved by the expiration date.
