enbridgeUS.com

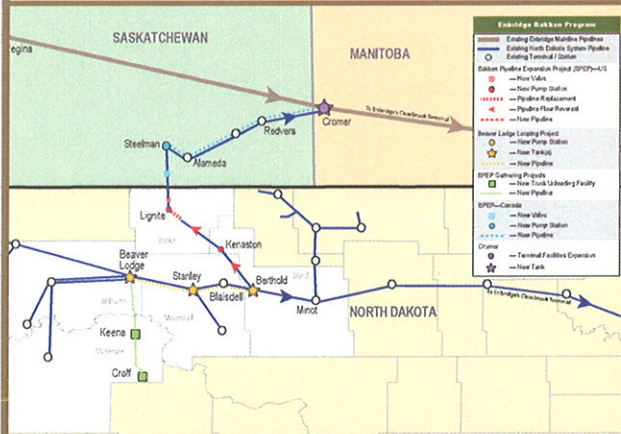

Invested in North Dakota...

For 50 years, our pipelines have crossed the plains of North Dakota, safely and efficiently transporting the state's crude oil production. Through the booms and busts, we've been here, and will continue to be here for years to come.

Building more than pipelines...

With our Bakken Expansion Program, we are investing \$370 million to provide critical pipeline capacity for the region's thriving oil industry. North Dakotans will benefit from increased revenue through jobs and retail purchases, millions in additional property taxes paid by Enbridge and increased oil royalties for the state.

Did you know...

Enbridge has invested more than \$1 billion in expanding pipeline access for North Dakota oil producers.

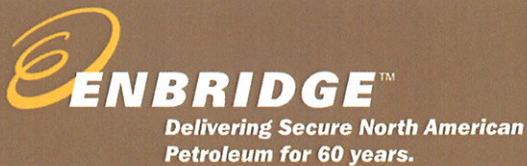

Enbridge doubled the capacity of the North Dakota System from 2006 to 2010 and plans to once again double capacity by 2013.

It would take more than 500 trucks to transport the 145,000 barrels per day being added by the Bakken Expansion Program.

Enbridge has tripled its employee base in North Dakota in the past five years.

Enbridge contributes to projects that focus on health & safety, culture & community, education and environment in our host communities.
