

Stanley 6/6

Case No. 18051: Application of Clean Fluid Solutions, LLC for an order pursuant to NDAC § 43-02-03-51 authorizing the construction of a portable treating plant to be located throughout the State of North Dakota and such further and additional relief.

Case No. 18072: Application of Hess Corp. for an order amending the applicable orders for the Robinson Lake-Bakken Pool to authorize up to nine horizontal wells to be drilled on four 1280-acre spacing units described as Sections 3 and 10; Sections 5 and 8; Sections 16 and 21; and Sections 28 and 33, T.154N., R.93W., and up to eighteen horizontal wells to be drilled on a 2560-acre spacing unit described as Sections 31, 32, 33 and 34, T.155N., R.93W., Mountrail County, ND, eliminating any tool error requirements, and such other relief as is appropriate.

Case No. 18073: Application of Hess Corp. for an order amending the applicable orders for the Alkali Creek-Bakken Pool to authorize up to nine horizontal wells to be drilled on two 1280-acre spacing units described as Sections 19 and 30; and Sections 20 and 29, T.154N., R.94W., Mountrail and McKenzie Counties, ND, eliminating any tool error requirements, and such other relief as is appropriate.

Case No. 18096: Application of Marathon Oil Co. for an order amending the applicable orders for the Van Hook-Bakken Pool, Dunn, McLean and Mountrail Counties, ND, to allow wells to produce at a maximum efficient rate through December 31, 2012, or for such other relief as is appropriate.

**STATE OF NORTH DAKOTA
PUBLIC SERVICE COMMISSION
Enbridge Pipelines (North Dakota) LLC
Beaver Lodge Loop Project - Williams,
Mountrail & Ward Counties
Siting Applications**

**Case No. PU-10-613
NOTICE OF FILINGS,
NOTICE OF INFORMAL HEARING,
AND NOTICE OF OPPORTUNITY
FOR HEARING
May 30, 2012**

The North Dakota Public Service Commission's (Commission) May 18, 2011 Findings of Fact, Conclusions of Law and Order issued to Enbridge Pipelines (North Dakota) LLC (Enbridge) a Certificate of Corridor Compatibility and a Route Permit for the construction of the Beaver Lodge Loop Project (Project) located in Williams, Mountrail, and Ward Counties, North Dakota. The Project consists of approximately 56 miles of 16-inch diameter pipeline and additional pump station facilities and tankage at Enbridge's existing Beaver Lodge, Stanley, and Berthold Stations.

In the May 18, 2011 Order the Commission granted Certificate of Corridor Compatibility No. 119 and Route Permit No. 129, which included Paragraph 8 of the Tree and Shrub Mitigation Specifications incorporated into the Findings of Fact, Conclusions of Law and Order, and stated, "The width of clear cuts through windbreaks, shelterbelts and all other wooded areas shall be limited to 50 feet or less unless otherwise approved by the Commission." In a letter dated May 2, 2012 Enbridge requests that the Commission amend Paragraph 8 of the Tree and Shrub Mitigation Specifications for Tract Numbers BB-82-18, BB-82-19-1, BB-82-20-3 and BB-82-21-1 on the west half of Enbridge's Beaver Lodge Loop Project, and requests an increase in clearing of trees and/or shrubs from a width of 50 feet to 125 feet, restricted to a length of approximately 200 feet on Tract BB-82-18, approximately 200 feet on Tract BB-19-1, and a combined 1500 feet on Tracts BB-82-20-3 and BB-82-21-1. All affected locations by this amended Tree and Shrub Mitigation Specifications are located wholly within Mountrail County, North Dakota.

The issues to be considered in Enbridge's request for an amended certificate of corridor compatibility and amended route permit are:

1. Will the location, construction, and operation of the proposed facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?
2. Are the proposed facilities compatible with the environmental preservation and the efficient use of resources?
3. Will the proposed facility locations minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?

Those interested are invited to comment on the applications in writing. Persons desiring a hearing must file a written request identifying their interest in the proceeding and the reasons for requesting a hearing. Comments and requests for hearing must be received by June 28, 2012. If deemed appropriate, the Commission can determine the matter without a hearing.

An Informal Hearing of this matter is scheduled to begin on June 20, 2012 at 1:45 p.m. CDT in the Commission Hearing Room on the 12th floor of the State Capitol. At the informal hearing, the Commission will discuss this matter with the parties and interested members of the public.

For more information contact the Public Service Commission, State Capitol, Bismarck, North Dakota 58505, 701-328-2400; or Relay North Dakota, 1-800-366-6888 TTY. If you require any auxiliary aids or services such as readers, signers, or Braille materials, please notify the Commission at least 24 hours in advance.

NOTICE OF INDUSTRIAL WATER AVAILABILITY FROM WAWSA

The Western Area Water Supply Authority (WAWSA) is constructing regional water transmission pipelines from the Williston Water Treatment Plant to water systems located in and around Ray, Wildrose, Crosby, Tioga, Ross, Stanley, Grenora, Alexander, Arnegard, Watford City and Johnson's Corner as part of the Western Area Water Supply Project. This regional transmission pipeline is sized to meet the water supply needs for the expected future residential population, including cities and rural water uses, in the year 2030. For the foreseeable future, there will be excess water depots or for industrial users who wish to connect directly to the regional transmission pipeline at their expense.

This publication provides notice that there will be a limited amount of water available for industrial sales, currently priced at \$0.84 per barrel. WAWSA contemplates entering into water supply agreements with parties interested in contracting for a set water volume over an extended term. There will also be public water available at WAWSA water depots with no volume or term commitment for water users that set up accounts with WAWSA.

WAWSA water is being sold or expected to be sold at water depots at the following locations beginning on the following dates:

- City of Williston at 2nd Street: currently available
- Keene: currently available
- North Williston: June 2012
- Indian Hill: June 2012
- 13 Mile Corner North of Williston: September 2012
- Ray: January 2013
- Alexander: October 2012
- Watford City: January 2013
- And at other Member owned depots by January 2013

Parties interested in obtaining industrial water from WAWSA can submit an application form found at www.wawsp.com. A map of the pipeline route and depot locations can be found on the website as well.

For further information about WAWSA industrial water availability, please contact WAWSA Executive Director Jaret Wirtz at 701-580-3164.
