June 13, 2013

Dear Land Owner,

In the late summer of 2012, Rangeland Energy replanted trees that were removed from the 'right of way' for the existing pipeline installed in 2011. Due to the late timeliness of the replanting process, we understand that some of the trees did not survive due to the time of the season. With that, Inergy Crude Logistics, LLC would like to follow up with you concerning the trees in question.

- A. Did the trees replanted within your tree windbreak survive?
- B. If not, would it be possible for Inergy Crude Logistics, LLC to replant the trees that did not survive?
- C. And if so, would you like the trees replanted in different area other than the existing windbreak along the existing Inergy Pipeline?

Please respond directly to Troy Hopkins at 701-859-5001 ext. 303.

Best regards,
