

regarding modifications to the Project layout, which incorporated the modifications submitted on July 3, 2018. On August 15, 2018, I provided a certification pursuant to Provision No. 38 of the Certification Relating to Order Provisions regarding modifications to the Project layout, which incorporated the modifications submitted on July 26, 2018 (the “Modifications Certification”).

4. Since filing the Modifications Certification, Meadowlark has made additional minor modifications to the Project layout. A figure comparing the layout as submitted with the Modifications Certification to the current Project layout is attached hereto as **Exhibit A**.

5. The layout modifications include the following:

a. Four turbines have each been shifted less than 150 feet:

i. Turbine 11, Turbine 24, and Turbine 43 were each shifted less than 50 feet to incorporate minor engineering changes in final design.

ii. Turbine 32 was shifted approximately 110 feet to move permanent infrastructure away from the highway right-of-way.

b. Minor collection line shifts were made to incorporate minor engineering changes in final design.

6. The four turbine modifications comply with the setback and shadow flicker commitments set forth in Order Paragraph No. 4(c) and (d), and the Commission’s sound avoidance area criterion. In accordance with Order Paragraph Nos. 7 and 8, updated noise and shadow flicker analysis reports are attached as **Exhibits B** and **C**, respectively. Please note that while the modeling indicates that four participating residences (receptors 2, 3, 12, and 44) may experience shadow flicker levels above 30 hours per year, and four participating residences (receptors 1, 2, 3, and 12) may experience sound levels above 50 dBA within 100 feet of the residence, the owners of each of these residences previously executed shadow flicker

acknowledgments and/or sound level waivers (see Appendix D to the Certification of Continuing Suitability Filing).

7. None of the proposed modifications are outside of the areas previously surveyed for cultural resources and wetlands.

8. The Project layout modifications and associated construction activities will not affect any known exclusion or avoidance areas within the designated Project site.

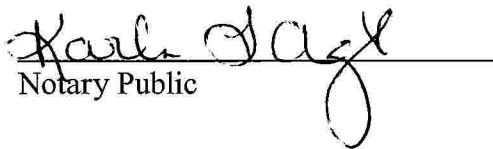

9. With respect to the Project layout modifications, Meadowlark will comply with the Commission's Order, including applicable siting laws and rules.

FURTHER AFFIANT SAYETH NOT.

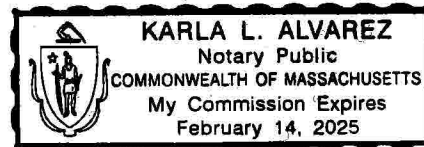

Paul F. Wendelgass
