**STATE OF NORTH DAKOTA
PUBLIC SERVICE COMMISSION**
Whiting Oil and Gas Corporation
Crude Oil Pipeline - Billings and
Stark Counties
Siting Application
Case No. PU-11-102
OAH File No. 20110326
NOTICE OF FILINGS ANDNOTICE OF HEARING
August 30, 2011

On July 11, 2011, Whiting Oil and Gas Corporation (Whiting) filed an application for a certificate of corridor compatibility and an application for a route permit to authorize the construction and operation of 6.8 miles of 8-inch crude oil pipeline located 6 miles northeast of Belfield, in Billings and Stark Counties, North Dakota. The project is shown on the attached map.

Whiting also filed an application for waivers of procedures and time schedules including:

- Procedures that require separate filings of applications for a certificate of corridor compatibility and a route permit,
- Procedures that require separate notices of such applications,
- Procedures that require separate hearings on such applications.

The Commission finds the applications are complete.

A Public Hearing on the applications is scheduled to begin at 10:00 a.m. (Mountain time) (11:00 a.m. Central time) on October 10, 2011 at the City Hall, 107 Second Avenue Northeast, Belfield, North Dakota.

The issues to be considered in Whiting's application for waiver of procedures and time schedules:

1. Are the proposed facilities of such length, design, location, or purpose that they will produce minimal adverse effects and that adherence to applicable procedures and time schedules may be waived?
2. Is it appropriate for the Commission to waive any procedures and time schedules as requested in the application?

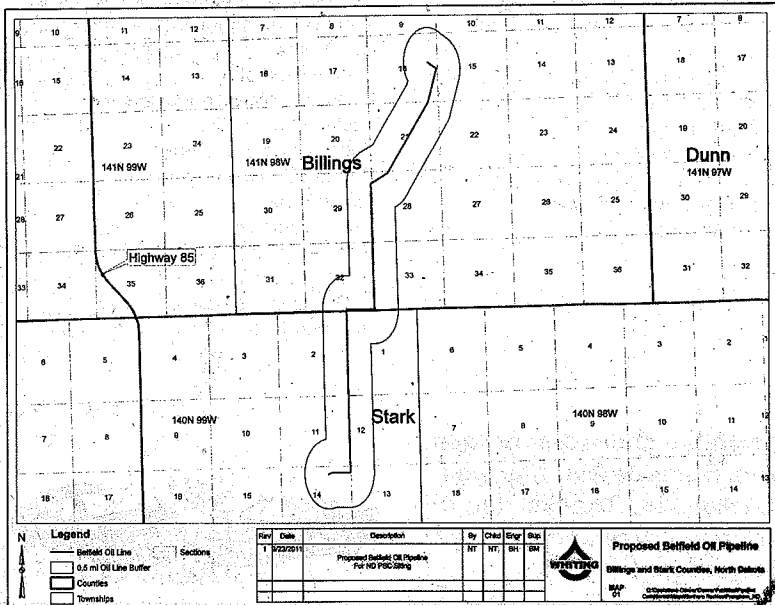

The issues to be considered in Whiting's applications for certificate of corridor compatibility and route permit:

1. Will the location, construction, and operation of the proposed facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?
2. Are the proposed facilities compatible with the environmental preservation and the efficient use of resources?
3. Will the proposed facility locations minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?
