
DEFINITIONS

APPLICANT

Enbridge Pipelines (North Dakota) LLC.

AVOIDANCE AREA

An Avoidance Area shall not be considered in the routing of a transmission facility, or in the case of the proposed project, the expansion of an existing facility, unless there are no reasonable alternatives.

DELIVERY

A volume received at a location where the hydrocarbon commodity enters the Enbridge pipeline system.

DESIGN CAPACITY

The theoretical capacity of a pipeline for a given type of liquid and their batch sequence. Design Capacity is calculated assuming theoretically ideal operating conditions.

ENBRIDGE

Enbridge is the term used to collectively describe the various Enbridge companies, affiliates and legal entities, some of which are defined below.

ENBRIDGE ENERGY, LIMITED PARTNERSHIP

Enbridge Energy, Limited Partnership owns and operates the liquid pipeline system known as the Enbridge "Lakehead System". Together with Enbridge Pipelines Inc. in Canada, these operationally integrated pipeline systems form the longest liquid petroleum pipeline in the world.

ENBRIDGE MAINLINE SYSTEM

A term used to describe the U.S. and Canadian portion of a major liquid pipeline systems owned by Enbridge Energy, Limited Partnership and Enbridge Pipelines Inc. respectively.

ENBRIDGE PIPELINES INC.

Enbridge Pipelines Inc. is a wholly owned subsidiary of Enbridge Inc., who owns and operates the Canadian portion of the existing Enbridge Mainline System. These operationally integrated pipeline systems which interconnect at the U.S./Canadian International Border Line to form the longest liquid petroleum pipeline in the world. Together, these two systems are referred to as the "Enbridge Mainline System."

ENBRIDGE PIPELINES (NORTH DAKOTA) LLC ("EPND")

Enbridge Pipelines (North Dakota) LLC ("EPND") is a wholly owned partner of Enbridge Energy Partners L.P. EPND owns and operates a crude oil gathering and interstate transportation system that gathers crude oil from points near producing oil wells in North Dakota and Montana. Most deliveries from the approximately 185,000 bpd on the North Dakota System

DEFINITIONS

are made at Clearbrook, Minnesota, which provides connections with the Enbridge Mainline (Lakehead) System and a third-party pipeline that transports crude oil to refineries in the Minneapolis/St. Paul area. With the reversal of Line 26, EPND also has export capacity to transport 25,000 bpd north to the US/Canadian International Border for further transportation by EPND's affiliates to Steelman and Cromer for access to Enbridge's Mainline System. See Exhibit A.1, EPND System Overview Map.

EXCLUSION AREA

An Exclusion Area is a geographical area that should be excluded from consideration for the routing of a transmission facility, or in the case of the proposed project, the expansion of an existing facility.

INSTRUMENT PIGS

Internal electronic inspection tools that are equipped with computers and travel through the inside of the pipeline examining the pipe's condition, i.e., detecting dents, gouges, corrosion, cracks or other anomalies in the pipe.

LINE 26 REVERSAL PROJECT

The reactivation and flow reversal of Enbridge's Line 26 and placing the line in northbound transportation service to move an incremental 25,000 Bpd of crude oil production from Berthold, North Dakota to the international boundary between the U.S. and Canada.

POLICY CRITERIA

Policy criteria are those factors which are positively affected by the project that may lead the Commission to give preference to an applicant.

PROJECT AREA or PROJECT SURVEY AREA

EPND has defined its "project area" or "project survey area" to include the existing Berthold Station property consisting of 106.11 acres of land owned by EPND and located in Sections 20 and 21, Township 156 North, Range 86 West; the Berthold West property, consisting of approximately 92 acres and located immediately west of the existing Berthold Station and north of the BNSF railroad in Section 20, Township 156 North, Range 86 West; the Berthold South property, consisting of approximately 319 acres and located southwest of the existing Berthold Station (south of the BNSF railroad) in Sections 20 and 21, Township 156 North, Range 86 West; and all properties are located within Ward County, North Dakota. See Exhibits B.1-B.4, Berthold Station Expansion Plot Plans.

RECEIPT

A volume at a location where the hydrocarbon commodity enters the Enbridge Pipeline (North Dakota) LLC pipeline system.

DEFINITIONS

SELECTION CRITERIA

Selection criteria are those environmental resources and land use factors for which the project must have an acceptable minimum amount of impact, as determined by the North Dakota Public Service Commission.

SHIPPER

A customer, who transports volumes on the common carrier pipeline system, including crude oil producers, refiners and/or marketers.

STUDY AREA

The study area for this Project shall be defined to mean one-half-mile buffer associated with the perimeter of the project.
