

TEN YEAR PLAN – July 1, 2011

BRIDGER PIPELINE LLC

RECEIVED

JUL 01 2011

PUBLIC SERVICE COMMISSION

- A.) Bridger Pipeline Company has no energy conversion facilities.
- B.) Bridger has no energy conversion facilities under construction.
- C.) Bridger does not plan on constructing any energy conversion facilities within the next five (5) years.
- D.) Bridger does not plan on constructing any energy conversion facilities within the next ten (10) years.
- E.) Not applicable.
- F.)
 - 1. System maps included.
 - 2. Type and Capacity
 - a. Product type: Crude Oil.
 - b. Length of facilities:
 - Fryburg to Baker, MT - 77 miles total; 44 miles in North Dakota
 - Skunk Hill to Fryburg – 16 miles.
 - Hwy 23 to Skunk Hill – 77 miles.
 - Parshall Gathering System – 210 total miles of gathering pipeline.
 - c, e. Pipe Size and Maximum Operating Pressure.
 - Fryburg to Baker, MT – 10 3/4" .221" WT API 5L x42 ERW steel line pipe, 1350 MOP.
 - Skunk Hill to Fryburg – 8 5/8" .188" WT API 5L x42/x52 ERW steel line pipe. 1440 psi MOP

Hwy 23 to Skunk Hill – 12 3/4" .250" WT API 5L x42 ERW steel line pipe, 1440 MOP

Parshall Gathering System – 4 1/2", 6 5/8" and 8 5/8" steel, 4 1/2" composite pipe. Various operating pressures.

d. Maximum Design Flow Rate.

Hwy 23 to Skunk Hill – 40,000 bpd

Skunk Hill to Baker – 80,000 bpd

Parshall Gathering System – 50,000 bpd

f. Pump Station Specifications.

Hwy 23 Station – One 800 hp pump.

Hwy 200 Station – Two 350 hp pumps.

Skunk Hill Station – One 1500 hp pump

Fryburg Station – One 2000 hp, 3 – PD pumps (various HP)

Bosserman Station – One 2000 hp pump.

Parshall Gathering System – Over 100 pumps between 20 hp and 250 hp.

g. Minimum cover 36 inches except 18 inches in rock areas.

3. In Service Dates.

Hwy 23 to Hwy 200 – August 2011 planned.

Hwy 200 to Skunk Hill – June 2011

Skunk Hill to Fryburg – 2009

Fryburg to Baker, MT – 1983.

Parshall Gathering System - 2008

4. Bridger does not anticipate retiring any of these facilities in the next ten years.
- G.) Not applicable.
- H.)
1. Completion of Fours Bears Pipeline is planned for August 2011.
 2. Fours Bears Pipeline provides crude oil pipeline service from central McKenzie and Dunn Counties to Skunk Hill, and on to Baker, MT.
 3.
 - a. Product Type: Crude Oil
 - b. Length: Approx. 77 miles
 - c. Pipe: 12 3/4" .250" WT x42/x52 API 5L steel pipe.
 - d. Design: 40,000 bpd rate and 1440 psi MOP.
 - e. Pump Stations planned:

Hwy 23 Station – 1500 hp, 30,000 bpd capacity.
Hwy 200 Station – 600 hp, 12,000 bpd capacity.
Skunk Hill Station – 2000 hp, 40,000 bpd capacity.
 4. Construction started October 2010. The Hwy 200 to Skunk Hill segment was in service June 2011; the Hwy 23 to Hwy 200 segment is planned to be in service August 2011.
- I.) No specific major pipeline facilities are planned for the next 10 years. However, given the intense drilling and production activity in our service area of Western North Dakota and the demand for crude oil transportation by pipeline, major new pipeline projects by Bridger are likely.
- J.)
1. Crude Oil pipeline service to an area or well is rarely, if ever, duplicated.
 - 2., 3 and 4. The ability to plan for future construction is limited by and dependent on drilling activity and shippers' need for service in a specific area.
- K.)
1. As a pipeline, Bridger provides what is probably the most environmentally benign form of crude oil transportation. In pipeline

construction, we use our own expertise in route selection, we also utilize archaeologists, BLM personnel and USFS personnel to ensure that environmental impacts are minimized. The pipelines are constructed, tested and maintained to ensure integrity of pipeline coatings and cathodic protection.

- L.) 1 and 2. As previously noted, Bridger is dependent on drilling activity in the service area and on shipper's request for transportation service.
- 3. Parshall Gathering System and Fours Bears Pipeline maps are included.

Stanley Truck Station

Mountrail County

Ehlert Station

Lake Sakakawea

McLean County
